

God's Laws

An Introduction

This document is a transcript of a seminar delivered by AJ Miller (who claims to be Jesus) as part of God's Laws series, giving an overview of God's Laws and how to understand them

Delivered By

Jesus (as AJ)

God's Laws - An Introduction: Part 1	1
1. Introduction.....	1
1.1. Many spirits do not understand God's Laws	1
1.1.1. People are often confused when they pass into the spirit world	1
1.2. Emotionally confronting terminology.....	2
1.2.1. Learning the true meanings of words.....	3
1.2.2. Understanding God's Laws from an emotional perspective	3
2. God created all Laws.....	3
2.1. God's Laws create an orderly operation of the universe	3
2.2. Most of God's Laws operate on the soul	4
2.3. Discovering God's Laws.....	4
2.4. God's Laws need to be understood emotionally, not intellectually.....	4
3. The heirarchy of God's Laws	5
3.1. Laws governing our physical existence	5
3.1.1. Our spirit bodies are governed by different laws to our physical bodies.....	5
3.1.2. Utilising physical laws.....	6
3.1.3. Many physical laws are yet to be discovered.....	7
3.1.4. The physical laws are the lowest laws of creation	7
3.2. Laws that operate on the soul.....	7
3.2.1. Practices that focus on the spirit body	8
3.2.2. The Divine Love Path changes in the spirit body	8
3.2.3. The soul is distinct from the spirit body	9
3.3. Moral laws operate upon the soul	10
3.3.1. Moral laws are the Laws of Natural Love.....	10
3.3.2. Moral laws affect where people pass to in the spirit world.....	11
3.3.3. People's location in the spirit world is not fixed and can change rapidly.....	11
3.3.4. Emotions that are denied create more damage than emotions that are being experienced	11
3.3.5. Learning about the Laws of Natural Love in the spirit world.....	12
3.3.6. Breaking the Laws of Natural Love create penalties in our souls.....	12
3.3.7. Our souls determine which spirits are drawn to us	12
3.3.8. Helping dark spirits is a very loving act	13
3.4. The Laws of Divine Love are the most powerful laws and operate on the soul.....	14
3.4.1. The Laws of Divine Love are the most simple laws.....	15
3.4.2. When we understand the Laws of Divine Love we automatically understand all other laws.....	15
3.4.3. The Laws of Divine Love transform the soul into a new creature.....	16
3.5. Summary of the hierarchy of God's Laws	17
3.5.1. Religious teachers often pass into a hellish condition due to them breaking moral laws	17
3.5.2. Not all manmade laws are God's Laws	18
3.5.3. Atoning for teaching untruths through repentance.....	18
3.5.4. We need to understand God's Laws emotionally	20
3.5.5. Sin against the Holy Spirit	20
God's Laws – An Introduction: Part 2	22
4. Sin and Error	22
4.1. The meaning of sin is to miss the mark	22

4.1.1. Mankind often associates sin and penalties with punishment.....	22
--	----

5. Breaking God’s Laws has consequences 23

5.1. God’s Laws all operate for a loving reason	23
5.1.1. Providing protection for our children from evil spirits	24
5.2. The consequences of breaking laws are automatic judgements.....	24
5.2.1. God does not judge us; judgement is an automatic consequence	24
5.3. Working in harmony with higher laws circumvents the consequences of lower laws	25
5.4. God’s Laws create the potential for us to create.....	25
5.5. God’s Laws make it impossible to make a permanent mistake	26

6. God’s Laws provide a way to discover truth 26

6.1. Learning from others.....	27
6.2. Learning from God	27
6.2.1. Learning from God requires humility	27
6.2.2. Receiving Divine Love enables our souls to learn by becoming more sensitive.....	28
6.2.3. God’s Laws expose emotional error	29
6.2.4. Negative feedback through pain and suffering	29
6.2.5. Positive feedback	29
6.2.6. The example of the Law of Desire.....	29
6.2.7. The example of discovering Divine Truth	30
6.2.8. An example of a previous relationship of AJ’s.....	30
6.2.9. An example of discovering cancer.....	30
6.2.10. Receiving mixed feedback	31
6.2.11. Understanding God’s Laws provides a way to end all suffering.....	31
6.2.12. Becoming at-one with God is a gradual process	31
6.3. The Laws of Grace, Forgiveness and Repentance	32
6.4. What attracts people to the Divine Truth.....	32

7. Closing Words..... 33

God's Laws - An Introduction: Part 1

1. Introduction

Today I'm going to give an introduction to God's Laws. The reason why I decided to do this talk today is that most of us have a lot of trouble with law. We have a lot trouble with this whole concept that we're governed by something. Now some of us are quite happy to be governed by things because it makes our life much simpler. If you can go to somebody and get a law from them to tell you what to do, then it makes your life more simple, you don't have to think or feel much about it at all; you just do what they say. Now the problem with that of course is that we are now trying to open up our souls and our hearts, and we are trying to get to the stage where we are going to be running everything from our emotions. Now if we are governed by laws and we are trying to run these laws through our mind intellectually, what's happening most of the time is that we are trying to check every one of our actions with what we know to be the law of the time.

So for example, before we started our discussions a year and a half ago, many of you didn't know the full extent of the Law of Attraction. You didn't realise how it all worked. There's a lot of information out there about it but all of it seems to be fairly conflicting and it's not always very clear, and what we have a tendency to do then is we go down the track of, "I don't really know the law so I'm just going to live my life how I see fit." Now of course in time when your soul is harmonious with God completely, living your life how you see fit is quite easy and you will never break a law doing it that way. But up until that time, if you live your life how you see fit right now and you've got emotions in you that are sad or angry, or other kinds of those emotions inside of you, what's going to happen? Well quite a few people are going to receive some of your anger and quite a few people are going to receive the results of some of the other emotions that you have within you, which will actually be breaking some laws.

So we have to get this balance somehow of how do we progress without actually creating more damage to ourselves in the process? If we continue to allow ourselves to continue to progress, at some point we are going to come up with this problem that we have within ourselves and that is this issue of how much do we follow the law intellectually or how much do we learn about this law from an emotional perspective? And what are the laws anyway and do I need to learn every law? So these are some of the issues we want to discuss today. Most of us are not aware that there is a whole hierarchy of laws, how some laws overcome some other laws and we will go through that today, as well as how different laws affect our soul and even our physical form.

1.1. Many spirits do not understand God's Laws

I've also invited a lot of spirits here today and one of the reasons why I've done that is that there are a lot of spirits in the spirit world, particularly in the first sphere of the spirit world, who do not understand law. If you imagine for a moment if you spent all of your life here on earth, you didn't really understand much about God or perhaps you really didn't believe in God much. You found out different things about your life and you lived what you thought was a pretty good life; you did good things for others but some things happened to you that were quite damaging to you emotionally and physically, so you had some anger and different emotions build up in you. Then all of a sudden something occurs in your life and you pass. You pass from an illness or you pass from an accident or from old age. When you pass in that state you wouldn't actually have very much knowledge where you are going to, would you?

1.1.1. People are often confused when they pass into the spirit world

So imagine you arrive in the spirit world and somebody comes to meet you and starts talking to you about different things. Now you'll be very tempted to want to keep talking about all of the things that you were talking about on earth. So if you were worried about money on earth then you might talk about what happens with money now. If you were worried about your family on earth and what's happening with them then you would want to talk about that. If you worried about different matters pertaining to your livelihood in the spirit world then you'll start talking about how everything works there. So there are a lot of physical things that you'll be starting to address.

But there's this other problem that goes on inside of us, and that is that our soul is a reflection of the emotions in it. So we are often locked into a location in the spirit world that is not as nice as where we are here on earth. And so we start worrying about that and we start wondering how that occurs. We start asking questions. But the problem is that surrounding us there are often a lot of people who are in the same place that we are in. It's like having all these new people who you don't know very well. But you've met them in the sleep state, so you remember that at least. And then you get together with them and they all have very much the same concept that you have. So if you're a scientist and you pass, you'd probably get together with a group of scientists and they would have a very fixed concept with a few additions of what they feel the spirit world is like. If you're in some kind of religion on earth, such as a Christian, you'd have a very fixed concept of what should happen when you pass and when you pass there'd be a lot of people surrounding you who have the exact same concepts as well.

And so they are like the blind leading the blind in a way; nobody really knows the full extent of how everything works. Everyone wants to know but they don't know who to ask because there's nobody who knows much more than they do themselves. So it's very, very confusing. So when we get into that state when we start feeling confused, what do you start doing then? You start backing off emotionally, saying, "I give up," and, "Well, what's the point?" and, "I'm just going to live my life here like I lived my life on earth." And a lot of times that's what they do.

So a lot of the spirits that have been invited here today are actually living their life in a very, very similar way to what they did on earth. But they are in the spirit world and they know they are in the spirit world. Also there's a whole group of spirits who are very, very drawn back to the earth. You've heard the term "earth bound". So they're drawn back to the earth because they don't like where they are in the spirit world and they'd prefer to be here. So there's a whole group of those kinds of spirits influencing what's going on too but they don't understand why that's the case. And you know what it's like if your entire life you do not understand? Many of us at the moment feel at least that we are starting to understand our life. But you imagine passing over and then coming to grips with all of these things that you've never heard of before, never emotionally connected to before, never wanted to investigate before and now all of sudden you are just confronted with them all at once. That's going to be a fairly traumatic experience isn't it?

And so many of these spirits haven't learnt about God's Laws and they don't understand why they are where they are and you know what that's like; if you don't understand why something is happening it gets pretty confusing. How many of you went to some kind of learning institution when you were younger? Obviously we have generally all been to school and also maybe to university. What was it like when you didn't get something? How confusing inside of you did it get? How difficult was that emotionally to deal with? "I just don't understand this!" Often that's the case with mathematics at school, particularly maybe in Year 5 matriculation or the later years where the mathematics starts getting quite complicated. And you're starting to really have a problem conceiving what it's all about. Imagine that emotionally; imagine you being in that state emotionally. Many of the spirits who are here are in that state emotionally.

So what we want to do is address all of these issues in a nice concise way that helps you understand Divine Law, as an introduction. Every single law has its own principles, which we will talk about at later times. So at a later time we'll talk about the Law of Cause and Effect for example and we'll talk about what it actually means and how God created it, why God created it and all of those kinds of different detailed aspects. But today we will give an overview of all of these laws. Not an overview of each individual law but how God designed the law generally, for what purpose and what's actually going on, not only right now in your life but also what happens when you pass.

1.2. Emotionally confronting terminology

One of the things I'd like to say is that I am going to use terminology that triggers you emotionally today. So I'm going to talk about terms such as "sin" for example. How many of you, when you hear that word "sin", just have this "Argh" feeling, this religious, "Oh that doesn't sound very good" feeling? What about the word "judgement"? How does that one get you? Not too happy with that word. You see every single word that is used has an emotional impact upon us because of an emotional injury inside of us. In itself the word "judgement" has a specific meaning but it becomes emotional for us if there's some unhealed feelings within us. Many of us feel some emotions about the word "judgement". Now you can understand why? It's because in particular when we were young, we were judged all the time and often condemned and punished in the process, and so that's obviously very unpleasant. So what happens now is that whenever we hear the word "judgement", we just rebel.

1.2.1. Learning the true meanings of words

Today I'm going to use words like "sin", "judgement" and "penalty", which are all part of this law system that God made. But they don't have the meanings that you think they have. They don't have the emotional connotation that you have placed upon them in most cases. So we will talk about the true connotation, the actual truth about those terms. The other thing I wanted to do today is get you to focus on your feelings because what often happens when we hear a talk about God's Laws is that we go all intellectual on it; we start going down this process of trying to work it all out in our minds. Now the problem with that is that you are going to avoid some pretty key emotions within you if you do that today, and you will feel quite triggered in this talk because we'll be talking about sin, judgement, penalty and those kinds of terminologies, which most of us have associated with some kind of religious viewpoint. We are going to start having those emotions within us triggered. So the key for you is to allow yourself to feel the emotion that you feel about these things.

1.2.2. Understanding God's Laws from an emotional perspective

Once we've defined them and worked our way through all of that we'll find that all of these terms actually have loving connotations and that's something that will be quite surprising to us once we get to the state of feeling it. So my suggestion is to stay away from the intellectual analysis of law and get into the emotional space where you feel what the law means. So for example, we can intellectually analyse the Law of Attraction and say that it means there is a soul feeling inside us that attracts events in order to experience this emotion within us, and oftentimes the event is negative. But there is also a positive soul feeling in us that can attract an event and then the experience is positive. The Law of Attraction is this soul attracting all of the events around us. Now I can go very negative about all of that. I can start getting very afraid of my day to day life; can you see why? "I've got all these really bad emotions, I can feel them in me and what are they attracting?" And I start analysing what each one is attracting, but you don't need to do that; you need to understand the law from an emotional perspective and this is what we want to try to do today.

So hopefully that will give you an introductory groundwork of what we want to accomplish today. Are there any questions about that so far?

Participant: Interesting that you stated the Law of Attraction was negative.

Yeah that's right because most people actually feel the Law of Attraction is negative. The truth is that the Law of Attraction is also actually very positive, in fact in my opinion it is always positive but the majority of us don't see it that way. We worry about our Law of Attraction like, "What are my fears pulling into my life now?" How many of you worried about something last week? Worried about the money you had, worried about the life you had, worried maybe about having an accident and maybe how much of your actions were dependent upon avoiding those things that you are worried about? Quite a lot probably!

Well, there's a Law of Attraction at work in a negative way and so for many of us what we think is negative is actually very positive because you are avoiding some emotions, which we'll learn. And we think it's negative. So the key thing for us all is to focus on the fact that everything that God has designed is for the operation of a loving universe. So what we're also going to address is how, if everything is loving, sin and error came about and how pain came about. So we'll also address that in this discussion.

2. God created all Laws

2.1. God's Laws create an orderly operation of the universe

All laws are created by God, which I've already stated. God made them. Why did God make them? For the orderly operation of the universe! There is nothing you can do that can create anarchy in the universe. There are certainly plenty of things man can do to create anarchy in his sphere of operation. So in other words if some person on earth decided to press the button to detonate an atomic bomb, then obviously we could have an atomic war which could be very, very damaging to this particular earth. But it's not going to damage the rest of the universe. God's Laws all govern the universe perfectly. And even if man damaged the earth to the point where there was radiation for thousands of years or

hundreds of thousands of years, most of the things that occur after that will eventually return to the way that everything has been designed. Eventually there'll be no radiation back on earth and eventually life will start regenerating again. God has made everything that way. Nothing you can do can actually ruin the universe.

2.2. *Most of God's Laws operate on the soul*

That being said, there are plenty of things you can do to damage yourself and other people through the choice of not acting lovingly. But we'll discuss that separately; how pain and suffering came into existence. Also all of God's Laws operate upon the soul. Now do you remember what the soul is? The soul is our emotions, desires, passions, aspirations, intentions. It's the soul that has free will. So almost all of God's Laws operate upon the soul and this is why the majority of people are not aware of what's happening because most of us are not even aware of what our soul is, let alone how laws operate upon the soul. But almost all of God's Laws operate upon the soul.

The soul is the container for our emotions, passions, desires, aspirations and so forth

Now there are some laws that God has designed to operate upon the spirit body, which is attached to the soul, and there are some laws that God has designed that operate upon the material body, which is attached to the spirit body. And in fact there are some laws that operate upon each component of the material body and there are some laws that operate on the components of each component of the material body right the way down to the particles that form the entire physical universe. So there are laws that operate upon those particles as well. Now can you start seeing that if we start adding up the laws that affect us personally that there are in fact literally millions and millions of laws that affect us personally?

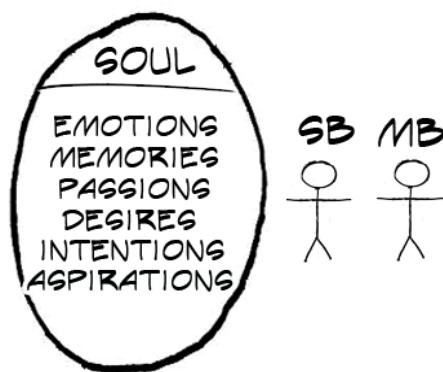

2.3. *Discovering God's Laws*

Now many scientists in the spirit world spend their whole existence of hundreds of years at a time just investigating one particular law. And then once they've investigated that and they think they understand that then they go to another particular law. Can you imagine how long it's going to take to know what the laws are? Because they are infinite in nature you can investigate God's Laws for an infinite amount of time and still not know them all. That's the problem with law - there are so many of them. How do we even discover them? And how can we ever know what they are?

Now at this point, a lot of spirits in particular are feeling a lot of emotions of, "I'm just giving up, what's the point? I'm just going to live my life how I see fit." But if you understand the hierarchy of laws, then you'll understand that there's really in the end only one group of laws. All you need to do is understand that group of laws and everything else will change for you. That's one of the things we'd like to discuss today as well.

2.4. *God's Laws need to be understood emotionally, not intellectually*

Now, if the soul is the primary thing upon which all laws operate, then it is important for us firstly to understand the soul, which we have dealt with in previous discussions. It's also very important for us to get away from our minds, which are in our spirit bodies, and our brains, which are in our material bodies.

We are souls, and have a spirit body and a material body as appendages

We need to get away from analysing things intellectually and into this space of analysing things at the emotional level. When we do that we'll start understanding the purpose of every law.

3. The heirarchy of God's Laws

3.1. Laws governing our physical existence

So if I give you some examples: The Law of Gravity operates upon your physical body. It doesn't operate upon your spirit body; it operates upon your physical body. So if you go up to an unusually high building, stand on the edge and decide to jump off or are pushed off, or fall off accidentally, what is the result? The same result generally; you hit the bottom and straight away a separation occurs between your soul and spirit body and your soul and your physical body because your physical body cannot sustain the damage it receives from the fall.

But there's another law besides the Law of Gravity, which is the Law of Aerodynamics. Now the Law of Aerodynamics is that if I have a certain type of structure somehow attached to me, I can actually overcome the Law of Gravity. So I can actually safely jump off the building and glide around within the Law of Aerodynamics until I hit the ground. So it's a combination of the Law of Gravity and the Law of Aerodynamics that governs what happens. But it's actually quite safe; in fact how many of you have never been in an aeroplane? So we can spend all this time in the air and we feel to a degree, safe. I say to a degree because many of you don't feel safe when you're flying and can feel quite agitated. I once knew a man who had five or six heavy drinks every single time before he could actually fly. But we often do it because we know intellectually it should be safe; probably more so from walking across a crowded street in many cases.

So what we're doing then is we're focussing on our physical body; our physical body is utilizing the Law of Gravity and utilising the Law of Aerodynamics in order for it to do something. I don't see too many of you complaining about the Law of Gravity either, for example, "The Law of Gravity really annoyed me today!" Is that what happens? It's very rare. "I really want to get rid of this Law of Gravity; it's a pain in the neck. I don't know what God was thinking about this Law of Gravity." And in fact the truth is that the earth is spinning around at quite a speed and if there was no Law of Gravity where would we be? Somewhere out in space because there's this force that would fling us out there. So the Law of Gravity is actually a very loving law, it keeps us on this earth and it keeps us being able to sustain life as well for the physical body, so it's a lovely law. Not a lovely law when you fall off a building though. There's a penalty associated with breaking the law but in that regard most of us don't complain about it so much do we? Most of us just accept the physical penalties for the physical breaking of that physical law.

3.1.1. Our spirit bodies are governed by different laws to our physical bodies

Now the Law of Gravity does not affect the spirit body. There's a whole different set of laws that affect the spirit body. At the instant you pass, you'll never again experience the Law of Gravity. It will never govern your life. That's pretty amazing when you think about it. Just that one physical law! That one law will never be experienced by you in the spirit

state. So can you see also that there are different laws affecting different locations whether I am in the physical form or in the spirit form?

Participant: The experience in the dream state of flying; is that the spirit body flying?

That's the spirit body flying. And the spirit body is totally capable of flying even when you're in the awake state, by the way. I know some farmers who check their fences by lying down and going into a meditative state. They let their spirit body step out of their physical body and they actually go to their entire perimeter of their fence line, notice where the break is, if there is a break, and then they just drive straight to that location and fix it up. You can do that because your spirit body is not controlled by the physical laws, so you can actually do that in a conscious way. Many of us don't know how to do it but we can actually do it in a conscious way.

Participant: So in our awake state can we be impacted by another person's spirit body in their awake state? I'm assuming that when we are asleep the spirit body could perhaps help another, but if I'm awake and you're awake would our spirit bodies in another location affect another person?

Certainly they can. In fact it happens all of the time through the Law of Attraction. Bear in mind that most of us feel that there are huge separations between the spirit body state and the material body state. The actual truth from God's perspective that there is no separation between these states; it's just a matter of learning the laws that govern the states and straight away you will know how to utilize them. So this is why there are many spirits who are over-cloaking people on earth who are on the natural love path. They are actually showing people how to break a lot of those, or utilize a lot of the spirit body laws and overcome a lot of the physical body laws through their actions. So this is why you get gurus in India who can telepathically talk to another person for example. All they are doing is using their spirit body communication but it can be used at any time by any of you. Many of them can manifest a physical object; you've heard of them pulling out a diamond ring or a gold coin or whatever from their pocket? You've heard rumours of all of those kinds of things? Some of you have even heard that there have been over one hundred and fifty recorded cases on earth of people actually levitating. So how did that happen? Something must be going on; there must be some kind of thing to do with laws going on.

So in every case we have a set of laws governing the different parts of our existence. The first set of laws governs the physical part of our existence. When I say physical, I don't mean that it doesn't govern our spirit body, what I mean is, there's this group of laws that are physical and metaphysical in nature that govern the operation of the physical universe in all of its dimensions. So I've been saying to you that there are over 22 dimensions in existence in the universe and there are physical laws that govern every one of those dimensions. And I'll classify them as a group of laws called 'physical or metaphysical laws'. Gravity falls into that category, aerodynamics falls into that category, photosynthesis falls into that category, electromagnetism falls into that category.

3.1.2. Utilising physical laws

These are all the physical laws that govern the operation of physical things in our universe. Every one of those is a law that mankind can discover and many have been discovered and are utilised every single day of your life. Many of you use electricity every single day of life. So that's a law that's been discovered that you now utilise all the time. And yet hundreds of years ago it wasn't widely known at all, and a thousand years ago and it was just imagination for some people that it actually existed. But it is an actual law that we as a human race eventually discovered and now we are at the stage where we utilise it every day.

The Law of Aerodynamics is the same. A hundred years ago it was just a dream other than for certain people who were ballooning. A thousand years ago that wasn't happening so much at all. But now we're going up and down and up and down all the time, taking flights to different locations and it's like second nature to us in most cases. So can you see how once we discover law it becomes easy for us to re-use it over and over again?

PHYSICAL

I would classify all of the laws I've just mentioned as physical laws, the physical laws that govern the universe. And do you know what? Most of us are the most fascinated with those laws. If I could manifest a gold coin in my hand right in front of you, all of you would be very impressed, wouldn't you? If I could walk on water you'd be impressed. It doesn't take much to convince somebody does it? All you have to do is that one thing; you could have all of these other things wrong in your life but as long as you could do that one thing, everyone would be very impressed. Is that not the case? You see the problem is, we are all so impressed with someone who's able to seemingly transcend the physical laws but actually all they are doing is utilising them. We are so impressed with them because we don't understand there's a whole set of laws that are much greater, much more powerful and in fact from God's perspective, much more beautiful than the ones we are looking at.

Many of us have become addicted to listening to people who are able to transcend the physical laws, or rather utilize the physical laws, to demonstrate truths to you. And if you think of all the different spiritual paths that you've been interested in, in the past how many times were you originally attracted to it because of something physical? If we're honest with ourselves we will see that it's quite often that we've been attracted to something because of something going on physically. Almost every Indian guru can do these kinds of things. And by the way they themselves personally can't necessarily do those things because they are often almost completely over-cloaked by a spirit in their life who can do those things through them, by using their ectoplasm to do these things. But it appears they are doing it and we are so addicted to looking at that and thinking, "Wow, that means they must have a lot of truth for me to listen to." We are automatically attracted to that kind of event because for so many of us we don't know even the physical laws, so we become so fascinated with the fact that they can be utilised in different ways that we are not aware of.

In the future these physical laws will become more and more widely known and many of the so-called forms of energy that you have today will not be used any more as there will be whole new groups of forms of energy. There are five new groups of forms of energy that scientists have defined right at this point in time related to quantum physics but they have no idea how they work at all. You can investigate these things on the internet if you want but there's no dollars being thrown at it because what does man do? We throw dollars at things that are going to earn dollars and profits. So there are no dollars being thrown at it because it might take ten years or fifteen years for man to understand using his normal way of investigating these things. So instead what we do is the government throws billions of dollars at things they feel will probably work.

3.1.3. Many physical laws are yet to be discovered

So there's this whole groups of laws from a physical and scientific perspective that mankind is yet to discover at all. That in itself is pretty exciting. You imagine what kind of laws they might be. And this is even how most of us have come to fly, because somebody did use their imagination. In fact imagination is a key way of connecting to other people in the spirit world who know about these laws and can give us these laws. We'll talk about some of that at a later time.

Does everyone understand at this point? We have this whole group of physical laws; they are the generally laws that we are most fascinated about. So many of you love reading about this fantastic thing that happened by this person, "Wasn't it amazing what he could do? Isn't he fantastic?" And we often go into that. We are not interested in the person's emotional condition, we are not really interested in how much love the person has, but we are actually fascinated with what the person can do. If you're honest with yourselves you can see that's the case. So that's the group of physical laws.

3.1.4. The physical laws are the lowest laws of creation

From God's perspective the physical laws are the lowest laws of creation. They are the laws from God's perspective with least impact upon you. From our perspective we think they have the most impact upon us but from God's perspective they actually have the least impact upon us. Because there's another set of laws.

3.2. Laws that operate on the soul

The next set of laws operates upon the soul. Now remember the spirit body is really just a material body in the spirit world, so this set of laws doesn't operate on the spirit body. The next set of laws operate only upon the soul. And this is where there is a lot of confusion in our spirit friends who are in the first sphere who have come today because they thought that this whole new group of laws would actually operate upon the spirit body. But the reason why they thought that was the case is that they can see the brightness of the spirit body and they then deduce from that, that obviously that

person is in a different place. And so they start thinking that the soul is the spirit body. So many of you have been doing things like New Age philosophy or other types of philosophy that has a fair bit of focus on the spirit body, but the spirit body just reflects the condition of the soul.

3.2.1. Practices that focus on the spirit body

When you're in your sleep state, and even right now sitting here, your spirit body reflects moment by moment what's going on inside of your soul. Now who's been to do some spiritual healing where you lie on the table and someone works on your chakras? So usually you lie on the table and somebody works on the different chakra energy points of the seven chakras that are in your body. Now what they do is they work in a certain way and they open them all up and maybe a bit of emotion dribbles out of you in the process. So they open it all up and they get them all working properly. How many of you have had it shown to you with a pendulum? So you see this pendulum rotating in a clockwise direction around that chakra when that chakra is open. Now you go back next week and that chakra is closed again so the person does the same thing again, they do their work on the chakra again, opens up the chakra again, you do a dribble of emotion sometimes and we go through the same process. What's actually happening is there are laws that govern all of that process but they are all to do with the soul. You see if there's not a change in the soul, that chakra is going to close again and this is why most spiritual healing forms as practised today, if they are not focusing on soul emotions, they are not actually accomplishing much.

Participant: I'm just a little bit confused about the spirit body. Is it an orb of colour or is it an actual ghost? Is that what a ghost is?

The spirit body and in fact all forms of energy give off colours, so the spirit body gives off what is called an aura or a group of colours. Now if the spirit body is in a poor condition it will not give off a strong aura or its aura will be damaged in some way, so there will be holes in it. A person who can see an aura will see the different shapes and colours inside the spirit form, but that's not the spirit body itself. The spirit body itself has organs just like your body, but they are in a different dimensional space. Sometimes some of you will notice the organ operating. So the spirit body has a heart for example and so sometimes if you've gone into a meditative state and felt the beating of your own heart, and then you've gone into a deeper meditation state and what's happened then? You start feeling a really high velocity beating going on in the same location as your heart, which is actually your spirit body's heart. It's actually an organ in your spirit body.

Participant: My name is Dr George and I'm a master pranic healer. I teach all over the world and some of the things you've told me quite impress me but if I could correct you there are 360 chakras in the body.

There's actually more than that.

Participant: No there's 360.

No there's more, I'm sorry to disagree with you but there is.

Participant: I must be wrong because I just talked to 4,000 people in Hamburg.

3.2.2. The Divine Love Path changes in the spirit body

Most of what has been investigated here on earth is investigated on the Natural Love Path, and on the Natural Love Path you are correct. On the Natural Love Path the spirit body has 360 as you mentioned. But the Divine Love Path actually transforms the soul and it changes the way the soul operates. It changes the number of chakras in the spirit form and so you actually have different chakras merging and growing and changing based on the changes of the soul. But this is not something that has been investigated on earth at all.

Participant: Another thing is there seven bodies, the soul...

No, can I correct you again? What you are discussing now is metaphysics. Metaphysics all come under this banner of physical laws. There are different layers of our spirit body but they are the one body.

Participant: I must correct you there. I can't work out what you are saying about the spirit body but it's the etheric body we are working on. The spiritual body is the soul body and if you want to know the format of the

soul it's a quantum theory called "The microcosm is equal to the macrocosm". All there is of one is one of all, I am that I am. This is the law.

Can I stop you for a moment? People did come here to listen to me not to you for a start. Secondly can I just address the issue from an emotional perspective? What's going on inside of most people today is that they want to understand from an intellectual and physical perspective. Now the problem with understanding all of these things from an intellectual and physical perspective is you'll only just discover certain things. You are correct in what man has discovered so far, but there's a whole group of things that man is yet to discover and that's what I want to talk about today.

3.2.3. The soul is distinct from the spirit body

When I talk about the soul I am not talking about anything to do with the spirit body at all. The spirit body's layers, which you described, are all part of the metaphysics that define the spirit body but they have nothing to do with the soul. The terminology "soul" comes from sixth sphere spirits thinking that the spirit form at a certain layer is the soul, but in reality that is not true. We can talk about that and argue about that but all we would be doing is arguing about Divine Love principles compared to Natural Love principles. You are right on the Natural Love principle side of things and everything you are talking about is correct but there is this whole other set of things going on at the soul level, which is a totally different creation to any of the things that has been discovered with regard to the body. Unfortunately what happens today is that many people use the same terminology for different things.

So when we start talking about the soul, what starts happening is we start referring to many spirits in the spirit world up to the sixth sphere, which by the way is where all this information is coming from. They are actually referring to things in spirit body, thinking they are talking about the soul. There are so many sixth sphere spirits here today who are thinking that when I talk about the soul, I am talking about what you are referring to but actually I'm not talking about that. I'm talking about some other part of you, which has control of these things that you are referring to as the soul.

So it's very important to actually maintain a separation between the concepts of what's being discussed. When I'm talking about the soul, and this is very important for everyone to understand, I'm not talking about what you've read about in metaphysical literature about the multi-layered construction of the spirit body. I'm actually talking about something completely different. In fact at some point in your future, you will actually connect to only that thing and these other bodies will not even exist for you. Now there are currently no spirits in the sixth sphere state who are in that state because you can't actually get into that state in the sixth sphere.

So a lot of what you've heard terminology-wise is not the terminology I am using here. When I'm talking about the soul, I'm not talking about any of the etheric layers, or any of the emotional body layers, or any other layer of the spirit body, even right down to what is defined by metaphysicians as the actual soul level state of the spirit body. None of those things am I referring to when I'm talking about the soul. The soul, which you truly are, is a completely different creation of God, and your body is just a manifestation of that state. And that's where I'm coming from here.

So when you see literature talk about the etheric layers of the bodies or the other layers of these bodies, they're actually referring to what's going on at the spirit body state, they're not referring to what's going on at the soul state. And in reality, and this is the beauty of what God has created, what's going on at the soul state is much more simple and easy to understand than what is actually happening in the spirit body and the physical body. So in other words, when you understand the soul, you will actually go through this process of letting go of all these intellectual definitions of what's going on in these states. In fact when you fully connect with your own soul, you'll find that the physical and spiritual states almost become something you never consider again. Because you know that all of these different states that occur happen at a different layer, which you were not previously aware of, but that you will become aware of.

So for any of you who are healers or any of you are doing spirit body work, understand that almost all the information that you have received about it relates to the spirit body and its construction, which goes from organs right the way through to different layers of energy and different layers of emotional experiences that are all part of its construction. But they are not actually the soul because the soul is the controlling force. So when I talk about the soul, I'm not talking about anything that you've read today in any metaphysical book.

The truth is that there are a lot more chakras, but most people have heard of, and work with, the seven primary ones. But in reality what happens also with the spirit body is that when the soul develops above the sixth sphere, all of these energy

points also start changing. And so spirits see them as different creatures. I've spoken to many spirits who actually believe that a person from the Celestial spheres is actually a different type of soul from a person who's in the sixth sphere or under because they don't understand how the people got to where they are. And by the way they are not different parts of the soul; they are the same part of the soul experiencing a different process. This is the Divine Love process which we have been talking about.

The physical is something we've already discovered. By physical I'm talking about all those things you've mentioned, all of the metaphysical things as well; that's all physical to me, that's also physical to God in the sense that everything that is going on in those bodies, everything that's going on around you in the universe energetically is all part of the physical universe. I don't mean just the material that you can see and touch when I'm talking about the physical.

3.3. Moral laws operate upon the soul

The next layer - and this is the layer that we have most trouble with – is the moral layer. Now the moral layer is a completely new layer of laws that we need to discuss. These all operate upon the soul.

MORAL

The physical laws all operate upon the physical operation of the universe, right down to atom particles. The Moral Law works upon the structure of the soul, which is totally different, and in fact it governs where you arrive in the spirit world. So this is where most people on earth have lots of trouble because we don't like to hear about morals. Ironically it's also mostly where religions have gone. For instance, most of the religions on earth have moral tenets, or moral laws if you like, that they tell their followers. So you've all heard of the law from the Bible "You must not murder"; that is a moral law. If you murder there will be an effect upon your soul. There's a moral law that you must love so if you don't love, there will actually be an effect on your soul. There are also lots of different moral laws governing sexuality and if you engage in sex without love, there will be an effect upon your soul.

3.3.1. Moral laws are the Laws of Natural Love

This group of laws is the group of laws that the majority of us don't want to hear about because we don't like the whole concept of our lives being governed by morality most of the time. Now if we allow ourselves to feel our emotions we often do like the concept of morality but intellectually; and often with our emotional damage we don't like the concept of morality. But there's a whole group of laws called the Laws of Natural Love. They operate upon the soul; they change the consistency of the soul. If you break those laws, the soul's own energy degrades and you will feel it emotionally. So it's not just a metaphysical operation that occurs, it's an emotional operation that occurs.

So if I break a physical law what happens? If I break the Law of Gravity and I jump off a building I get damage to my physical body. But if I was pushed I may have a different group of emotions associated with it. If it was an accident, I may have another group of emotions associated with it, but the actual operation of me just falling off a building and going kaput and separating from my physical and spirit bodies, the actual operation of that, what does that do? Nothing emotionally, unless I have some emotional experiences that are attached to it. With all of these moral laws, the Laws of Natural Love, they operate upon the soul, they all have an effect on our passions, and desires, longings, emotions, and they all have an emotional effect of some kind on us. Not just a physical effect; they have an emotional effect. They affect what's going on inside of you emotionally, inside of your soul, which is the real you.

LAWS OF NATURAL LOVE

The reason why they're called moral laws is that oftentimes they are deeply affected by morality. But they do not just include moral laws, there are laws about positive things about love as well that are all part of this group of laws. You could call them the next highest group of laws. So once you understand that highest group of laws, you'll automatically do all of the things that are underneath that. It doesn't mean that you'll know everything at this point but it does mean that you'll understand how God made the universe in terms of how it affects your soul.

3.3.2. Moral laws affect where people pass to in the spirit world

You see, most people when they pass over have no idea why they have passed into the first sphere or into one of the hells of the spirit world. They have no idea. The reason why they have no idea is that they've only understood the physical laws of God but they've never understood any of these moral laws. Or alternatively they've broken those laws in some way, and many people who are religious have broken them.

So for example you've heard of a law, "You must not murder," but you've also heard that if you feel like murdering somebody, you've already done it. In other words just having the feeling like you've wanted to murder is a breaking of the Moral Law. It's a law of the soul that affects the soul and it will affect where you go when you pass. So let's say you had some damaging things happen when you were on earth by a certain person. Let's say that person was your father who sexually abused you. When your father passes, he will obviously have a lot of soul damage because he's broken a lot of Moral Laws. But when you pass, if you have held on to that anger about all of those events, there's a high likelihood you'll have a lot of very dark emotions about the damage you would like to do to him in return. So you might have emotions like vengeance for example, wanting to take revenge. Well that causes your own soul condition to degrade, and while you may not pass into the same location that he passed, because he's actually done more damage than that, you may still pass into the first sphere holding on to that emotion, because holding on to the emotion you actually break some of these laws yourself.

3.3.3. People's location in the spirit world is not fixed and can change rapidly

So one time we were in Barbados talking with a group of spirits who passed into the spirit world as slaves. They were still living as slaves. On earth they were slaves and when they passed and went over into the spirit world, they still thought they were slaves. And they couldn't understand why they were in a location that resembled where they had actually lived on earth in terms of their experiences. They only began to understand it once we started relating to them how they had this emotion of vengeance in them, how they wanted to take revenge upon the people who had harmed them. Now once they released that emotion of vengeance and connected to some sadness, their condition grew almost instantly from that location to a new location. You can do that in the spirit world; you can shift your soul condition very rapidly and change to a new location.

So when you get to the spirit world most spirits feel that they are locked into that place and there are two reasons why they feel that way. One is because most Christian based religions have taught them that when you pass over you either go to heaven or you go to hell. And what's the other thing the Christian religion teaches you if you feel like you're in hell? You're stuck there and you can't get out of it. So that's one reason. Another reason why they feel it is in the eastern philosophies there's this viewpoint that once you arrive in the spirit world and you do your life review you have to come back to earth again and work through the karma. So there's literally millions and millions and millions of spirits in dark places in the spirit world trying to get back bodies on the earth in order to work through their karma, which has actually locked them in a position. None of those spirits need to be where they are, they can all progress right where they are in the spirit world; they do not need to come to earth at all to progress. But because of the belief systems that we've carried here on earth, they believe that they either have to reincarnate or they believe they either have to be confined to hell fire. They know there's no fire, but it feels torturous and they feel they have to be confined to that forever.

3.3.4. Emotions that are denied create more damage than emotions that are being experienced

Participant: If you break a law, say the law of murder for instance, if you're getting into an angry state because you're trying to release emotions and you feel like you want to kill somebody in that, where does that fit in with what you just said? Do we pull ourselves up and say, "Whoops, I want to kill that guy," or something?

I've answered this question before. If an emotion is denied inside of you but it exists, that is at its worst place. So let's say I have a murderous emotion towards my dad because of what he's done. While I deny that emotion within me I am actually in the worst soul condition. The instant I actually even intellectually acknowledge that I have this emotion in me,

I am automatically in a better condition and the instant I allow myself to feel that emotion I am automatically in a better condition again, as long as I'm feeling it in a way that's not harming others. So if I'm just feeling my anger, frustration and rage about what's been done to me, then I'm now in a better state. But if I'm feeling my anger, frustration and rage and wanting to punch my father in the face, now I'm in a different place; I'm now in a denial place around the emotion. Then if I go into a deeper state of even feeling the sadness I feel, I'm in an even better state again. And then as I go down into the emotion and eventually get to the core emotion and release it, now I'm in the release place of the emotion. In other words the emotion has left me completely and I'm in the best possible state with regards to that emotion. So it's going to be a gradual change as I work my way through these different realisation states with regard to the emotion. Don't think that if you have an emotion within you that your best course of action is to avoid it because it's actually it's your worst course of action. If you're thinking the best way is to step over it emotionally or to make yourself feel better through meditation, that's actually your worst possible course of action. The reason why it's your worst possible course of action is that your soul isn't changing. The only way it can change is by emotions that are being released from us. If the soul doesn't change then what's the point of the action? There's really no point of the action.

So if I've got a feeling or an emotion inside of me of hatred towards another person, just that step of acknowledging it actually puts me in a better condition. And the step of allowing myself to start feeling it and feeling what's underneath it puts me in an even better condition and once I've completely released it and get into a state of love with the person, now I'm in the best possible position with regard to that emotion.

3.3.5. Learning about the Laws of Natural Love in the spirit world

Now the problem with morals or the problem with the Laws of Natural Love is that when we pass into the spirit world it normally takes a few spheres of progression before we start realising that these laws exist. What that means is that for the majority of spirits who pass, they pass into the dark areas of the first sphere, not understanding how to get out of it and not understanding why they are even there, which is a very, very sad fact unfortunately. Now there are literally millions and millions of people trying to tell the truth to them as to why they're there but because of all of these beliefs that we've picked up on earth, we are often so locked-in emotionally that we can't accept what we're being told. One thing for all the spirits who are here is to bear in mind that if a person is in a brighter spirit body condition than yourself, then they know some things about life that you don't know. Simple as that and it's worth listening to them. The people who are in the brightest condition are the people who are worth listening to the most. And in fact if the persons are in the brightest conditions and are on the Divine Love Path, they are the ones who are really worth listening to because they will show you how to progress more rapidly than all the other spirits can show you.

3.3.6. Breaking the Laws of Natural Love create penalties in our souls

So because most of us have broken Laws of Natural Love on earth, there are certain emotions that are within our soul now as part of the penalties of breaking these laws. We'll talk about why that occurs. Now as these penalties are imposed upon the soul, the soul condition degrades, which causes the spirit bodies to degrade. Many of you have heard of spirit bodies looking like lizards and reptiles and whatever, have you not? All of the spirits who look like that are actually in very poor condition. So if you are a medium and connecting to spirits who look like that, you are connecting to spirits who are in very poor condition because the person who is in the best condition and in the most loving state looks like a perfect 21 year old person here on earth with no flaws, and they are very, very bright in their condition.

3.3.7. Our souls determine which spirits are drawn to us

Participant: Can't you choose not to draw those people to you?

This is something that is often misunderstood on earth. There's this idea that somehow we can choose what kind of spirits are attracted to us to talk to. In reality what is making the choice is our soul. So it's the soul's emotions that will attract them. So let's say that I have an emotion inside of me of powerlessness, I'm going to attract spirits who want to abuse my power. It doesn't matter how much I intellectually say, "don't you come," what will happen is that these spirits will be attracted to me because of the Law of Attraction. Now usually our spirit guides are trying to prevent them from having some influence over us but our spirit guides can't break the Laws of God either, they can only prevent us as long as they themselves are not breaking God's Laws in doing so.

Participant: Years ago, I had lots of troubled people coming to me; I have no fear of anything like that and I did it willingly and lovingly, feeling very confident that I could handle whatever came my way. And then I

gradually started to feel that it was no longer a path I wanted to take and gradually I no longer had those people coming into my life.

That's because your Law of Desire changes and as your desires change that will attract whole different types of people into your life.

Participant: So for me that's like a choice I made on a soul level that I no longer wanted to do that.

But it wasn't an intellectual choice; it was actually an emotional choice.

Participant: The more you get into love, the less it is intellectual because it becomes for me just a knowing.

3.3.8. *Helping dark spirits is a very loving act*

Yes, but can I put something forward to you? One of the most powerful things you can ever do is help a person in the worst condition.

Participant: Yes but they were manifesting all this weirdness and possession and all this stuff for me. But I don't think they wanted help, I think they were just trying to show that they could do it.

Under some circumstances it could be the case that they wouldn't want help but obviously there are a lot of people who are very heavily spirit possessed or obsessed who do want assistance. They have no idea why they've got the obsession and if someone can help that person, that's displaying a lot of love to them.

Participant: You can give a lot of love without doing it though.

No but you see you're worried about being influenced in some way by it. Why would you then stop doing it?

Participant: Because I found that I can do more helping people on a level of prayer without having a lot of contact. As I've become older I don't want to influence people but I find I can do much more with prayer, if you want to call it that, when you do it on a one to one. That's where I feel very drawn and I find it more loving that way.

That's fine for yourself but I'm saying to you that there's this whole other area of your life that you can actually change into as well where you will not be selective about who you are helping at all. You will feel a lot more love and you'll have a lot more love than you even have right now for those ones. And so what I'm suggesting is at the moment you're making decisions at the soul level based on Laws of Natural Love. But there's some Laws of Divine Love actually that the process has drawn you away from, and what I'm suggesting is that when you are in the space of actually learning those laws, you may be redrawn back into helping a lot of these ones but in a different way. Do you follow me?

Participant: Yes I do.

So the key thing to bear in mind with a lot of these discussions is that for most of us who are mediumistic or healers, we are drawn down certain paths of our life in order to learn a lot of personal lessons within ourselves. One of the personal lessons you would have learnt within yourself would be this Law of Love of Self for example, "Am I being loving to myself helping a person who doesn't seem to really want help?" Well obviously not. So you work your way through that Law of Love of Self for yourself, but there is a whole other set of laws which we'll talk about in a minute where you'll still have perfect love of self but actually want to help any person, and actually be in a position able to help any person more powerfully through the reflection of Divine Love in your soul, rather than the reflection of the Natural Love, which is coming from yourself.

Participant: I walked away from this a few years ago and I think a lot of times the people I met on the path were great but very much into their ego that they could do what they were doing. I found that a little bit hard and I didn't want to go down that path.

Of course, because that's not loving!

Participant: So I stepped back and have been following fairly strongly my own spiritual path but I don't want to get into that. I don't want to be a guru and I don't want people camping on my doorstep. I'd just like to do it quietly in the background.

Well that's an emotion inside of you. The truth is that when you get into a state when you're connecting with God fully at the oneness state, nobody else thinks of themselves as a guru for a start. If they think they're a guru, then they're not in that state.

Participant: Yes I know but that's what they put over.

I know but if they put that over they are not in that state. You know that and I know that. You've got to talk about reality, not what they think. So they might think they're in that state but they're not.

Participant: But that's why for me when I'm listening to you, it's like with some of those things you say I go, "Oh my God it was that easy and I struggled so hard and for so long." But I've done that with quiet reflection and growth in a different way.

But what I'm suggesting is the new changes you will make, and I feel you will make them, will actually step you into a totally different place where other people will see you as perhaps a guru but you won't ever feel yourself to be that way. Lots of people will be attracted to you because they want to hear the truth but you'll just have normal down-to-earth day-to-day interactions with everyone around you. When you get to at-onement condition with God you don't set yourself up as a guru. What happens is that people just invite you to do things because they want to hear the Divine Truth. And while a lot of the people who've set themselves up as gurus want to tell their truth, once you go through this transition into Divine Love what will happen is you'll just reflect God's Truth to everyone. One of the worries you have about that state is, "I'm going to be bombarded with people who want my help." That is actually an emotional injury you have within yourself about that, so allow yourself to work your way through that injury. When you trust God completely you won't feel that injury any more. So just allow these transitional changes to occur towards the Divine Love Path and then what will happen is that you'll find you will be free from any injuries that block you towards it at the moment, just like you have experienced in the past with your progression on the Natural Love Path. You've had that experience where you've learnt about love of self for example.

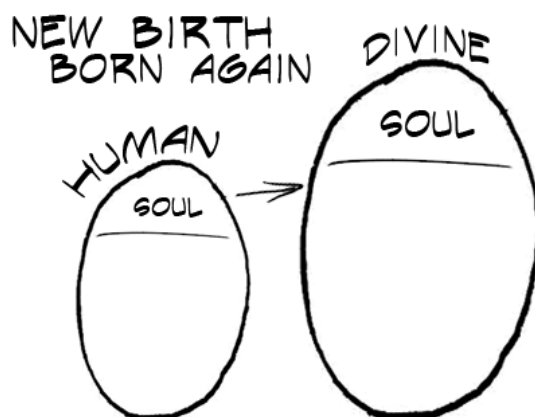

So getting back to the topic though, it's the emotions, desires and passions of the soul that determine and are determined by these moral things that we do, or the Laws of Natural Love, I would call them. Now later what we're going to do is we're going to talk lots and lots about the Laws of Natural Love. Tomorrow it will be on the laws governing the Love of Others. The next session in three weeks' time will be the on laws governing the Love of Self; what kind of laws govern the Love of Self issue. And then we'll talk about human relationships; having a relationship with a partner. In other words how these Natural Love Laws affect our interaction with our partner, what's going on with our partner, and how we can actually be assisted in our development together in a relationship. But none of those laws are as highly important as the next group of laws.

3.4. The Laws of Divine Love are the most powerful laws and operate on the soul

LAWS OF DIVINE LOVE

The next group of laws also impact upon the soul. But this next group of laws are about the transition of the soul from the human soul into the Divine Soul. So if you could think of your soul as it is now and then there's this other totally different creature that your soul can become. So we would call the soul with which you've been created as the human soul; every single person who's ever existed on earth has had that type of soul. Every single person with the human soul can undergo this transformation process into this, what I would classify as a Divine Soul. The process, which I have talked about before in previous discussions, is called the New Birth or Being Born Again. So there's this process that transforms the

average human soul into this completely different creature. This process that makes the transformation between the human into the Divine only occurs through the operation of a whole group of laws. The whole group of laws are called the Laws of Divine Love.

The human soul can become a Divine soul through the process of being born again

3.4.1. The Laws of Divine Love are the most simple laws

Ironically the Laws of Divine Love are the simplest Laws to understand in the universe. You see the physical laws are the most complicated to understand in the universe, and then the spiritual or moral laws are the next most complicated, but the Laws of Divine Love are the easiest to understand. So it's actually the opposite way round of how everyone thinks everything works. The way that God has made it is that a child can understand this group of laws, which makes sense when you think about it. Why make a universe where everything is so complicated that a child can't understand it? The truth is at this stage, these laws are so simple in their nature that the majority of the spirits in the sixth sphere of the spirit world and the majority of the intellectual people on earth completely rebel against even attempting to understand them because they are too simple for them.

And can you see one quality that is required to understand this group of laws? Humility! Oftentimes what we want is to have a complicated group of laws that only I can understand, and then, "I'm fantastic". But this group of laws is so basic that a child can understand them and that's why all of us need to become as little children. One of the reasons we need to become little children to enter the Kingdom of God is this process of the New Birth, the transformation of the soul from the human soul into the Divine. And the child understands this group of laws that actually causes this transformation process to occur, and we can understand it as a child.

3.4.2. When we understand the Laws of Divine Love we automatically understand all other laws

Now the beauty of that is that it's so powerfully simple. We can go through this process of actually understanding this group of laws and as we do there's another thing that happens; because our soul gets transformed by this group of laws, we automatically understand every other law. But we don't need to understand it intellectually. We just utilise it through our heart's desire. So when you are in this space in your soul and you feel like you want to fly, you'll fly. When you are a Divine Soul and you feel you want to teleport, you will teleport. You won't have to understand how teleportation works because you'll just have a feeling, "I just want to go there."

Now many of you have read spiritual literature about spirit world life, including "The Life of the World Unseen". One of the things that these books talk about is that you can be standing here, have a desire to be over there and then all of a sudden you are there. They all talk about that happening. Well that's because in the spirit world it's a lot easier to move from one place to another. But when you understand the Laws of Divine Love, you'll be able to do all of those kinds of things without understanding them, you'll just be able to utilise them all. In other words you basically understand them all without intellectually understanding them. Imagine picking up a musical instrument like some child prodigies do and then all of a sudden away you go; that's what it's like, exactly like that. Like the movie "August Rush", where the little boy gets any musical instrument and away he goes. It's an amazing movie, isn't it? A person connecting to their soul will start to be able to express themselves instantly in all these different forms.

At the moment a lot of the time what we're doing is we're using our mind to do things. So for example how many of you have had to have lessons to learn how to draw or paint? Often initially we go to lessons because we have a desire, but we don't know how to do it. Well the truth is we don't need to do that in this state, you will automatically be able to express what's going on. How many of you have learnt a musical instrument? How many of you didn't pick up the musical instrument and away you went? Most of us, right? Because we were learning it through our intellect! When we're learning things through this transformed soul, none of those things occur; you start learning in a totally different way.

3.4.3. The Laws of Divine Love transform the soul into a new creature

Now this transformation occurs between the seventh and the eighth spheres of the spirit world but it can be begun at any location; in the spirit world or on earth. So I can be in the depths of what we would term the hells, or the depths of darkness in the spirit world, and but through understanding the Laws of Divine Love in a bit of time I can understand how to make this transition at the most rapid pace possible.

So these Laws of Divine Love are very, very powerful. They transform the soul into a new creature. In fact sixth sphere spirits see this soul as a different soul to their own; they actually think that God created two types of souls, one of which their own is and one of which is this creature. There are Padgett Messages that talk about these souls flitting from sphere to sphere, "So God mustn't care about them very much because they can go anywhere they want." The truth is that because the Laws of Divine Love are the highest in hierarchy, souls that are Divine in nature are free; they can transcend all other laws by invoking these Laws of Love. When you are in this state, you'll be able to heal anything instantly as long as the law is satisfied. When I say as long as the law is satisfied, I mean when the needs of the person you are healing satisfy a certain law but its part of this Law of Divine Love. And you'll actually be able to release your emotions much more rapidly using these laws. Because there's a law called the Law of Repentance, which is a part of the Law of Divine Love, which actually governs what emotions you have or are harbouring towards others. And you can work your way through those laws and automatically have this feeling of grace or forgiveness through the Laws of Divine Love.

Now there are a lot of sixth sphere spirits and a lot of forms of spiritual progression on earth today that have heard intellectually about these laws. So you've heard the term "Christ Consciousness"? Well everyone who coins that term generally doesn't really understand what it means, because "Christ Consciousness" is about some of these Laws of Divine Love, which most people don't understand. You've heard the term "becoming enlightened"? Well what most people are discussing there, when they're a sixth sphere spirits, is the process of getting to the sixth sphere; they are not actually talking about this transformation of the soul. The transformation of the soul is a totally different process. You've heard of the Christian term of being "born again"? Well that is a part of this process that is part of the Laws of Divine Love but not in the way the average Christian understands it. The average Christian understands that it's because of my death that created the event for them. In other words Jesus dying for their sins and their belief in that causes them to be born again. That's not true, so there's a basic untruth in that but the whole viewpoint about being born again is true, you are being transformed into a new creature.

There is a lot of misconceived information on earth about those laws, due to an attempt to intellectually try to understand something that actually goes on within the soul at an emotional level. This is why I have focussed very much in the last year and a half on your emotions because without your emotions being involved in the process, you will not be able to go through this transition. The emotions are an essential part of actually making that transition.

Now as the emotions are released, what happens is the soul, through these laws, grows into this new creature. You've heard the term at-one with God? There are New Age and other viewpoints today that we are already at-one with God, but we just don't know it. There's this idea that you're all gods you are not aware of it yet, and when you become aware of it then you'll have self realisation, or enlightenment. That is not what I'm talking about. What I'm talking about is that becoming at-one with God is an emotional process, it's not an intellectual process. It's not a process that you can drive intellectually. You can assist yourself intellectually but you won't be able to drive it intellectually. It's an emotional process. All of the Laws of Divine Love operate only upon the soul and no other part of you. And that's why it's so important to understand them. But remember I said that a child can understand them? Well understanding them is one thing, but doing them is completely another thing. And that's where it's difficult. This world that we live in has become so designed to have everything happening in our head and have us understand everything before we feel it. But we will never get into the state of at-onement by using our intellect. We cannot get into a state of at-onement with God by using our intellect, it's physically impossible. It can only be done by the soul's growing. It can only be done by the soul transforming.

3.5. *Summary of the hierarchy of God's Laws*

PHYSICAL MORAL LAWS OF DIVINE LOVE

So in summary, we have this hierarchy of laws that we can group into three primary areas. The first area is the physical group. The physical universe is governed by all of those laws. There are literally millions of those laws that you can read up on, study about and you will be totally fascinated about the majority of them. They are all fascinating. Then there is this group of laws which we'll call the Laws of Natural Love, which are all operating upon the soul, and are a group of Moral Laws. Many of us have very little desire to understand them and the reason why is that "It sounds too religious and it sounds all too controlling of my life." That's what we often feel but those laws are often the laws that define your condition when you pass. So that group of laws will determine if you've broken them or lived by them in your soul, not in your head.

3.5.1. *Religious teachers often pass into a hellish condition due to them breaking moral laws*

The Laws of Natural Love will determine your condition, and this is why many religious people still pass into one of the first sphere conditions or in the hellish condition. The reason why they pass into those conditions is that they have not understood that me wanting to manipulate you into doing something I want you to do is harmful and damaging to you, and I have a penalty on my soul if I do that. So they don't understand that every time I get up in front of you and teach you an untruth, my soul condition just goes down. Imagine if you were a minister passionately teaching a group of untruths, you would expect to pass over in a good condition, wouldn't you? But if you've been passionately teaching a group of untruths that have affected so many people's lives, your condition is degrading in that process. It's a huge shock to most people when they pass.

Participant: But if the minister truly believes that he's doing the right thing, he's doing it with such passion and he's hoping that he's doing the right thing, I feel that's unfair that he's going to the lowest sphere if he doesn't know.

There is less of an impact if he didn't know than if he does know. So if there was a minister who was teaching a heap of untruths that he didn't even believe himself, he's going to be in a lot worse condition than a minister who actually fully believes everything he's teaching. However, things you teach have a huge effect on everyone around you, so imagine if you're one of the persons that this minister has taught and you believed passionately all of your life that my blood was the only way that you'd be saved, and you did the church dues. And then you passed over into one of the first sphere's locations in darkness, and you actually were in better condition than the minister who taught you, imagine how you would feel about religion then and how you would feel about God then. There would be lots of emotions you would have about that and who's responsible for that? Not just you, the minister who taught you is also responsible for that.

So it's very important to understand that when we teach we have a big responsibility. This is one reason why many teachers who are idolised here on earth pass in quite poor conditions because they have actually taught lots of untruths that now need to be untaught. So there is fairness to it. Everything God has done with Her Laws is fair, it's just often we don't think it's fair because we have our own definition of what love is or what fair is. So if you're teaching, make sure you are teaching the truth. It doesn't matter if it's just a little portion of the truth as long as you know it to be true inside of you. If you can feel the truth inside of you, then teach that but be aware that there are many people who have taught in the past who think they feel the truth inside of them but they're actually not understanding what that feeling is and they're still teaching falsehood. So there are many ministers who, as you correctly point out, are totally sincere, who fully believe in their heart what they think they feel, but actually they are being influenced through their feelings from different spirits.

So you know how sometimes you hear something and you have this feeling pass through you? A lot of people on the New Age path think that means that you are feeling, but actually a lot of the times it's not your feeling, it's actually a feeling

from a spirit who's with you and who agrees with that idea. And this is where it's so important to understand your own feelings, and then of course you can start to feel God's feelings come through you.

Participant: Where do the Ten Commandments fit into this?

3.5.2. *Not all manmade laws are God's Laws*

Some of them are Moral Laws, but some of them are actually not moral laws at all; some are manmade laws. Don't mix up a manmade moral law with a moral law of God. For example, many religious formats on earth today are totally condemning of homosexual relationships but that doesn't mean that is one of God's Laws. There are many laws that man has created but I'm not talking about those laws. I'm talking about Moral Laws that actually do exist from God's perspective. The Laws that God created. And yes, some of The Ten Commandments are related to those laws. "You must not murder" is one of those. If we murder we are harming someone else's free will are we not? So the Law of Free Will is broken. We are also not being loving to the person are we? So the Law of Love is broken. You can see there are quite a number of laws broken if we murder. So "you must not murder" is a Moral Law that is actually based on one of God's Laws.

Participant: Is that also applicable to some of the laws of Hinduism, Buddhism and all the other isms that there are some laws that are moral and some laws that are Divine Laws?

That's correct. Some are manmade moral laws. Most Buddhists don't accept a homosexual relationship, for example. That's a manmade moral law but that doesn't mean God made it, because God has made certain souls that when they split they incarnate into two male forms. So the truth is that God didn't make that law. Man has made it. So we need to differentiate between these two types of laws. There are a lot of manmade laws that we think are God's Laws but are actually just manmade laws because of emotions that exist within us. And we need to be very careful that we can see the difference between the two.

For example how many of you would feel justified in the "eye for an eye" law if somebody came along and murdered your son or daughter? Well the truth is that the majority of wars today are based totally around their feelings of justification about that. You look at almost all conflicts that are occurring on earth today and almost every one of those conflicts comes from an emotion within us that, "It is just for me to take vengeance upon you if you have harmed me." That is not a Moral Law of God nor is it a Divine Law, it's just an idea that man has come up with. The whole "eye for an eye, tooth for a tooth," which is actually also in the Bible is not a God-made law, it's a manmade law. So be careful between them because quite often you might read something but actually when you start analysing from an emotional perspective you can see that it has error.

3.5.3. *Atoning for teaching untruths through repentance*

Participant: AJ, how do those of us who realise that we have taught errors handle that now?

That's a very good question because there are lots of spirits here today who also want to ask this question. The way to handle that is to feel the feelings of repentance and sorrow about the fact that you've done it. This is one of the Laws of Divine Love. One of the Laws of Divine Love is that if you feel the feeling of repentance and sorrow, then God's Love can operate through you and take away the reason why you've done it. All of those people if they go through this process of repentance and sorrow, will actually progress very rapidly. The only other alternative to that is to feel the Law of Compensation of everything that you've actually taught and the effect it has had on every single person's life that you've taught.

So imagine if I were a priest living in the Second World War and I actually got up on the pulpit and said, "Its okay for you to go to war." So everyone in the audience would have heard me say that. Many of them would have felt justified through my statement to go to war and I could have read some Bible passages where the Israelites went off to war with the Philistines and the Israelites went off to war with the Palestinians and so forth, which is what they classify as different cultures, and they felt justified doing that. And I could justify you going off to war using this method and yet every single person's life that was touched by me saying that, I would actually have to go through an emotion about. That's the Law of Compensation. The Law of Compensation is a Moral Law but the Law of Divine Love is the Law of Repentance. If I go through a process of feeling deep sorrow and remorse for that and understanding what I had done, now God's Love can come and assist me through that process.

Now there are some really good Padgett Messages; you remember Luther, the Founder of the Lutheran Religion? When he passed he talked about what he went through in terms of going through in this process of repentance and how he progressed into the Celestial spheres, which is the eighth sphere and above, through this process of understanding the Laws of Divine Love. And he spends a lot of his time now trying to undo the effects of what he did on earth by trying to influence different people who have been influenced by his teachings to try and get them on to the Divine Love Path. So many people from all different types of religions are influenced by spirits who were once in that religion. But they are now on The Divine Love Path wanting to help you get off the path that they actually said was true, and onto the path that God says is true. And all of these spirits you can speak with of course if you're mediumistic so you can validate all this information as well with them.

Participant: So what you're saying about the Law of Compensation on the Natural Love Path, that's why if you decide to go on the Natural Love Path it can take you hundreds or even thousands of years of working through all your mistakes until you finally get anywhere?

You do gradually get somewhere obviously on that path. So if I had this realisation on the Natural Love Path that, "wow, actually I did get up in front of people and tell them to go to war," and I had this realisation that, "hey, that wasn't very nice that I did that and it's affected their lives terribly," I might then work through the issue of, "what can I do to fix that problem?" So I might spend hundreds of years trying to fix that with every single person in my congregation, if I were a minister doing that. And that would be what I need to do on the Natural Love Path through the Law of Compensation. But on the Divine Love Path I can actually go into this state of understanding emotionally at the soul level what I did to everybody. And through my relationship with God, bearing my sorrow about all of that with God, God's Love can actually remove from me the reason why I did it. Because I had a reason why I did it, and that reason might be that I didn't like Germans or I didn't like the English. That might have been the underlying reason why I did it, and so once I work through this emotionally, it can be removed and now I am in a state of repentance where all of those actions from God's perspective are now cleared from me emotionally. I will still probably have a desire to actually help those people but I won't feel as embroiled in their state as I would have previously. So the Laws of Divine Love are very powerful and it's important, I feel, for every single person in the universe to know them and it actually makes your life a lot more simple and easy to understand.

Participant: When you read the Padgett Messages, it reveals that souls that have passed into the darkest place in the hells have now progressed into the Celestial realms because they've discovered these principles that you're talking about and the ones that haven't are still there.

Many of them are still there or are slowly but surely getting into a different sphere. There are in the Padgett Messages descriptions of the experiences of spirits who have got to the sixth sphere after two, three or four thousand years and then they spent three or four thousand years there before they learnt the principles of Divine Truth, and so then they made the transition. And there are other descriptions where people learnt a lot about Divine Love on earth, like Luther for example, but when they passed over, because they taught error, there was a dark condition on their soul and then they had to work through that emotionally. And they worked through that quite rapidly and so progressed quite rapidly. So it all depends on what choices we make at the emotional level as to how fast we will progress.

There are a lot of spirits at the moment who are fairly excited about this now because what they've been taught over and over again is that they have to undo everything through the Law of Karma. So the Law of Karma is basically 'what you sow you reap', and you have to undo everything that you have created if it was in error. Now the Law of Repentance supersedes that law; it overcomes that law. So if you can understand and listen to the spirits who understand that law, then you can progress very rapidly rather than having to go through this terrible process of trying to undo everything you did in error. Of course many of the things you did in error were created in you by other people who did things in error and God of course recognises that as well, and this is part of the Divine Love Law that recognises that process.

Participant: AJ I've been sitting here and I've been having this kind of floating feeling. Floating in and out of understanding what you're saying. I feel like I understand it but then all of a sudden I get this feeling of not understanding it. I get this feeling I'm hearing, and then I just didn't hear what you said. Is that spirit influence through me? I felt as though it was.

Yes. Quite a lot of you are finding these conversations difficult for that reason because there's spirits connecting with you who feel a deep sense of confusion. They do not understand what's being talked about, they don't understand there's

Moral Laws and there's other laws that they didn't understand. Many of them also have emotions of, "how fair is this? How fair is this for me? I didn't know about these laws but I know I have broken them but that's not right. I shouldn't be where I am if I didn't know." A lot of people feel that way and many of you would probably feel that way if you had passed. So we need to help them to work through the fact they still need to deal with everything at the emotional level with regard to all of these things.

3.5.4. *We need to understand God's Laws emotionally*

So for these spirits that are with us who are listening to the discussions they need to understand that there's a very, very fast and simple way. But for many of them, understanding means intellectually understanding it and I keep going back to this point because there are so many spirits here who do not understand that the soul is their emotions and they need to actually allow themselves to feel.

Now when I talked about the teacher's responsibility to teaching truths, there's a whole group of spirits in this state who have been teachers when they were on earth who feel this terrible remorse about what they've taught. But they're not allowing themselves to actually feel their remorse in terms of crying their remorse. So they feel, "oh no, what have I done? What have I done?" You know that terrible feeling you have when you know you've done something wrong and you recognise it? But they're not allowing themselves to actually cry about it and talk to God about it, and that's what they need to do: cry about it and talk to God about it. And when they do that, then they'll connect emotionally and as they experience the sorrow of it, and their condition will grow. Your condition can only grow if you experience the emotion of it, not if you think the emotion of it. So you can think all you like, "yeah I did the wrong thing there," but until you're feeling that, your condition will not change.

Participant: For years, AJ, I studied the principalities of Thoth the Atlantean and The Emerald Tablets. They seem to be pretty definitive laws. I was just wondering what your view of that is? Did this man actually go on The Divine Love Path or the Natural Love Path?

Some of the spirits who have given the laws from all of these different kinds of forms are actually now on The Divine Love Path but when they originally gave those laws they were on the Natural Love Path. So the laws themselves reflect natural love laws, or physical or metaphysical laws, which they've put forward and written down. A lot of them are very deep in nature and are very true laws, but you don't need to understand them if you start practising the Laws of Divine Love. So a lot of us are drawn in to understanding them at the intellectual level, rather than actually feeling them.

3.5.5. *Sin against the Holy Spirit*

In the Bible there's a passage that I really connected to in the first century that caused all of these changes to occur within myself and it says, "The Law of God will be written on your heart." So in other words instead of you having to read something to intellectually understand it, when you get into this state of connecting with God through Her Divine Love entering you, the Law of God is actually written inside of you. You can't actually break a law when Divine Love is in your soul. When Natural Love is in your soul, you can break a law and in fact every sixth sphere spirit who is present with us today is breaking one law at least, and that is the Law of the Holy Spirit. And the law is, and you've heard me use this term maybe in the past, sin against the Holy Spirit. The sin against the Holy Spirit is refusing to connect to God at an emotional level and receive Divine Love.

Now many sixth sphere spirits, in fact every single sixth sphere spirit commits that sin every single day. So every sixth sphere spirit is actually breaking one of these Laws of Divine Love. It's not going to affect them at the Laws of Natural Love level, so they are going to live a very, very happy life at the Laws of Natural Love level. But because they are breaking the Law at Divine Love level, they will never get above that condition until they recognise they are breaking that law.

Participant: There's a Padgett Message where it's asked, "What is the greatest sin that you can ever commit?" and that's it, the one you just spoke of.

The one I just spoke of is the biggest sin you can ever commit. You don't get punished for it and your life can still be a semblance of happiness. In fact every sixth sphere spirit feels their life is extremely happy. However, they are preventing their own eternal and infinite progression. So imagine you have done everything else that you can do here on earth, you progress really well up to the sixth sphere in the spirit world, you have lived a really joyous life, you are actually breaking

a group of Laws called the Laws of Divine Love. And a sin against the Holy Spirit, or the breaking of this law, is about rejecting God's offer of Divine Love to actually transform your soul. You're not going to be punished in the sense that your condition will worsen, but you will never get to a state of at-onement with God or grow infinitely. And in fact every one of those spirits is totally aware that they are not immortal.

You see there's a constant concept here on earth that we are all immortal souls. The truth is that the only immortal soul is the soul that actually transforms from the human soul to the Divine. And this is one of the basic concepts here on earth that is totally misunderstood. And in the sixth sphere there are literally millions and millions of spirits constantly discussing every day how they can become immortal, and they discuss to the nth degree this whole process of immortality. But they do not have the humility to accept the very childlike teachings of the Laws of Divine Love to actually make the transition. And so they sin against the Holy Spirit in that place.

Remember when I say sin, it's missing the mark. That's all it means, it means you are aiming at a certain space, you're aiming an arrow at a target let's say and you're a bit off and so what happens? It doesn't hit the bullseye. Perfection is hitting the bullseye if you like and missing the mark, or sinning, is when we miss that mark. When I use the term sin, there is no negative connotation of it; sin is the effect of an emotional condition within you.

God's Laws – An Introduction: Part 2

One thing I would like to point out to you is that what often happens when we're having discussions like this is that there are spirits with us who are motivating us. What happens if you feel tired or lethargic or confused or any of those types of feelings, allow yourself to connect to them because it means that there's a spirit with you with a very, very similar emotion to you that's causing you to shut down a little to the discussion. Allow yourself to feel what that would be about; let yourself feel what that is about. A lot of spirits don't like to be told things they don't know, just like a lot of people on earth don't. And what's the standard way of handling that on earth? To just tune out or get distracted or do something else and often that happens to us over and over. So if you notice that happening in these discussions, some of the discussions coming up can be quite confronting emotionally so allow yourselves to feel about the discussion and allow yourself to see what's going on emotionally.

4. Sin and Error

Let's get back to the discussion. You notice I've missed out the section about sin and error so let's talk about that.

4.1. The meaning of sin is to miss the mark

Great word sin! A little three letter word, even worse than a four letter word! There are not many two letter words that really trigger us, but there are two main three letter words that trigger us: sin and God. Sin is a word that is often treated with a lot of really negative baggage but all it means is missing the mark.

SIN:
"MISSING THE MARK"

That's all it means. So if you have an emotional reaction to the word sin let yourself feel about that because you've got some emotions about your childhood, religion, and God to work your way through. The word itself really means missing the mark. In other words not being able to get where you aim! Now in the first century I said quite often to people, "You need to come perfect like God is perfect." That's fairly confronting as well if you think about it, isn't it? But when you think about it from what we're discussing, if I'm at-one with God and God is perfect, then I will be perfect in the way that I deal with people, the way that I treat people and all other ways because I am actually reflecting God's qualities. Anything that's not perfect is basically sin.

4.1.1. Mankind often associates sin and penalties with punishment

The problem that we often have with the word "sin" is this aspect of penalty, because when I use the word "penalty" most people think of the word "punishment". So when we use the word "penalty", or we talk of the Law of Compensation or the Law of Karma, which is, "What you sow you reap", we often think of the word "punishment", particularly if we've come from a Christian background, and our parents took us to church where we were taught that we were a naughty person. And even in our interactions with our own parents, we are taught this principle of punishment. How many of us have spanked our child when it's done something wrong, not understanding it's actually our Law of Attraction being reflected from our own soul condition? Most of the time we don't understand that and so we finish up punishing our child for reflecting what we're denying in ourselves, which is actually very unjust. But we do it and so when we are grown up we have these terrible viewpoints of penalty and punishment.

"MISSING THE MARK"
PUNISHMENT
(PENALTY)

5. *Breaking God's Laws has consequences*

The way God views it is this. Every single law is there for a reason and the reason is to maintain the harmonious universe that God created. Whenever we break a law, there is an automatic consequence; the penalty is the consequence. What is the consequence of breaking the law? Now remember I said earlier that the biggest 'missing the mark' you could ever commit is refusing the offer of Divine Love, which is currently being offered to you. That's the biggest sin you could ever commit. The consequence of breaking that Law is that you will never be at-one with God, and you will never be able to progress infinitely. Can you see how there's a consequence or a penalty for breaking that law? It doesn't mean that you won't have a semblance of happiness because you will. In fact every sixth sphere spirit who's with us today has a deep sense of their own personal fulfilment and happiness. But there is a consequence of their missing the mark with regard to the Divine Love Law, and the consequence is that they will never be at-one with God. They will never progress infinitely and they will never be at-one with their soulmate in a combined soul union state. That's the consequence of breaking that law.

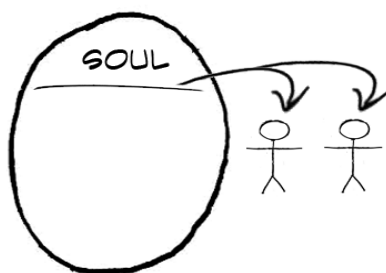

Every single law has a consequence for its being broken. Remember we talked about the hierarchy of the laws; we've got the lower level laws, which are the physical laws, then we've got the next level laws which are the moral laws, or the Laws of Natural Love, and then we've got the highest laws, which are the Laws of Divine Love. Now each level of laws has its own consequence for being broken. If I step off a high building, the consequence of the Law of Gravity is that I can physically pass. So that's a consequence of breaking of the law.

5.1. *God's Laws all operate for a loving reason*

Every single law is put into place by God for a loving reason. So let's look at the Law of Gravity. The earth's spinning around at about 700 miles per hour or a thousand kilometres an hour. What would happen if there's no gravity? We'd be flying through space the moment we're born. Can you imagine that? And unless there's something to stop us then you'd be out there. You'd have all these people being born just flying off the earth all the time, so there's a loving reason why the law was created. But there is also a consequence for breaking of the law and that is whenever we attempt to break the law there will be a consequence. So in the case of Law of Gravity there will be a physical consequence, where I might get injured or even die from the experience.

It's the same with every single law. So the emotional laws, or you could say the Laws of Natural Love, are all the same; there is a consequence. The consequence is upon the soul, not necessarily upon the bodies, although it will also become upon the bodies because of the way the soul is connected. So here's our soul, and we've got our two bodies connected to the soul, so obviously anything that happens to this soul is going to affect the condition of those bodies. This is why we feel so much physical pain at times because there's something going on emotionally at the soul level that creates these pains, and the denial of those emotions generally creates these pains in these bodies. The spirit body has its own pain.

So often when you talk to a spirit who is progressing but has not yet reached at-onement with God, they'll get to, say, the second sphere and they'll notice there are still little areas of their body that don't look very good, that actually look sick or sore. And when different spirits have come to talk to me, they've talked about their different emotions in different areas, like, "Why have I got this particular big crack down here? I never had that when I was on earth. What's going on? And when I look at this particular part of my face it looks a bit distorted, what's going on there?" And when you start connecting them emotionally to it, they start realising what the emotion is that's created that physical distortion.

Emotional penalties in our souls affect the physical and spirit bodies

The spirits in the lowest spheres of the hells can't even hold their body together properly, there's not enough attractive love in their soul to actually hold a physical form together clearly and so they are often in a very, very dark condition. They are very distorted with growth spots, and really look ugly. This is why many of your children have nightmares because sometimes in their sleep state our children aren't very protected by the protective force that we put around our children through our own condition, and so these spirits can easily come to them. And the child is worried because they see there's actually a grotesque figure. Many of you have personally had that experience in your own childhood, where you have been so freaked out by the grotesque figures that have come to visit you that you've just closed down your own mediumship abilities altogether.

5.1.1. Providing protection for our children from evil spirits

Participant: How can we make that better for our children now?

By changing our soul condition! When you change your soul condition, then what's happening is the protection offered by your soul to your children, which is automatic, is much greater. So there's something in your soul condition that's attracting it. So a lot of times it can be nothing that we would normally classify as bad. It doesn't mean it's an evil spirit attracted to you, or that you're evil, but what it does mean is that you might be afraid of evil for example. You might be afraid of being manipulated, you might be afraid of feeling powerless or you might have these different emotions that you need to allow yourself to work through. And those emotions that you need to work through will be the ones triggered by events like this occurring. So if your child comes to you and says, "Mummy, mummy I'm terrified," crying and scared and shaking, then of course the question you need to ask yourself is, "What emotion in me is this; what do I feel? Do I feel powerless?" Whatever emotion arises is the emotion you need to release from that Law of Attraction event. Let yourself release that emotion; your soul will be in a greater condition of protection. Once your soul is in a level of greater protection, the child won't be influenced by that connection either. Even if they're grown up and in their thirties, the same applies. Obviously many of our emotions are imposed upon our children so if we release the emotion it automatically enables our children, no matter what their age, to deal with their emotions, if they so choose.

5.2. The consequences of breaking laws are automatic judgements

So getting back to this consequence; every law has its consequence. You could then say that the breaking of any law is an automatic judgement. You see if a law has a consequence, then if I break that law, there's an automatic judgement on something around me. It might be physical, it might be spiritual or emotional, or it might be soul based. Let's look at it from the Law of Gravity point of view again; what's the judgement of me standing on the edge of the building and then just waiting to jump off? The judgement around the Law of Gravity is if I'm too high, if I can't land safely and I don't have the Law of Aerodynamics on my side or any other law on my side that prevents me from falling, I will kill my material body. That's the judgement instantly.

Now it doesn't mean that God has actually judged you, does it? The law itself has imposed its consequence; every single one of God's Laws immediately imposes its consequence upon you of being broken. Every single one of them! And in particular all the soul-based laws impose an immediate consequence. The problem is that at the soul level most of us are not sensitive enough emotionally to notice the consequence. But if we were, and in fact when you progress in Divine Love to the point of at-onement, you will become so sensitive emotionally, if you attempt to break any law, you will automatically feel the pain of it. Even if it's just an attempt to do it rather than the actual doing of it, the desire to do it will cause you to feel the pain of that. So do you think you're going to be breaking laws? No, you won't. And that's why the law becomes automatic because now it is written in your heart. When law is written in your heart, you can't break it. It's a physical, emotional, and soul-based impossibility for you to now break this law because of the immediate feeling you would feel if you did.

5.2.1. God does not judge us; judgement is an automatic consequence

So you could use the term consequence, or sometimes in the Padgett Messages the term judgement is used, which is referring to the consequence. There is an immediate judgement of what's going on at any one point in time, an immediate consequence. Now often we associate the term judgement today with the feeling that we're a bad person. God never feels you're a bad person. It's just that for any law you break there's a consequence. God doesn't feel you're bad if you break it. When you think about it, if God felt you were bad if you break it, it would be very unfair of God. Because did he not create the Law of Free Will too? And so if he feels that you're a bad person if you break His Laws because of the free will

that He gave you, wouldn't that be unfair? So God doesn't do that, God doesn't project judgement at you. All God does is create all of the laws, and every single one of them has a consequence that will impose itself upon you when you either break it or work in harmony with it.

5.3. Working in harmony with higher laws circumvents the consequences of lower laws

Now if you work in harmony with the highest laws, you are automatically circumventing all the consequences of the lower laws; that's why you don't even need to know them. So if I'm living perfectly in harmony with Divine Love at the at-onement condition level, it's as if any potential consequence of a Natural Law or a Moral Law doesn't exist to me. It's as if all these other laws don't exist to me anymore. The reason why they don't exist to me anymore is that I automatically follow them without thinking or without even feeling about them; it's automatically done because I'm already in harmony with the highest laws. So the beauty of that is that I don't even have to think about those laws or worry about them or care about them at all. I automatically overcome every one of them. I don't break them because I can't and I don't even want to, not because someone is preventing me or telling me what to do, but because I don't even want to break them in my own heart.

So hopefully that little discussion will help you see the relationship between this so called bad word "sin", and this idea of punishment and judgement. Now what's happened with a lot of religious forms on earth is that they have taken the term 'judgement' out of context from how I originally used it and they now imply it to mean that you're a bad or evil being. Now every single person can do bad or evil things given the bad or evil emotions that can exist within the soul. But every single person also in their pristine state doesn't have those emotions or those thoughts or those desires to do certain actions that are evil. The truth from God's perspective is that you are a beautiful being with emotional damage. God does not judge you as inherently evil, although many of you do have the emotion that you are inherently evil because of what's happened with regard to the consequences of sin on the earth today. So you're not inherently evil, you're not inherently bad. No one is in fact inherently bad. I once had this chat with this mother who said to me her daughter was bad from the moment she was born. Poor girl, having that projection of judgement from her mother from the moment she was born. It's a pretty strong projection and of course the girl is acting out that projection that she's evil of course.

So the word "judgement" doesn't mean these negative things that religion has taught us that it means. All it means is that there's an immediate consequence; that for every single action we take, every single thought we have, every single feeling we have there is an immediate consequence. Some of the consequences are fantastic and some of them are quite negative and sad and painful, depending upon whether we have broken the law or we have lived in harmony with the law.

So I don't know about you but I'm very happy about the Law of Gravity because it has saved me from dying of asphyxiation within a few seconds. You can imagine being flung off the earth at a thousand kilometres an hour straight upwards; it's not very many minutes by the time you exit the earth's atmosphere and you can no longer breathe. So the Law of Gravity has a lot of benefits.

5.4. God's Laws create the potential for us to create

And so you will come to actually love all of God's Laws because you will see them all as beneficial; they help you live in the universe that God's created. There are even laws, believe it or not, that allow you to create universes. So in your future life you will start seeing the effects of those laws as you work through your emotions. There are lots of things to look forward to with regard to laws. Every universe or dimension from the seventh to the twenty second was the universe that I created but there have also been people who've created universes at the lower end of that too. Remember that originally the first union couple were in the sixth sphere. There were no other universes available before then, so the fifth sphere, the fourth sphere, the third sphere, the second sphere and the first sphere have all been created by somebody. So I'm not the only person who has created universes, other people have too.

Participant: Would you like to make any changes?

It's really God's Laws that create the potential of you creating. So in a way I didn't create them but my soul condition invoked the law that created them. And so this will happen to you in your own progression too, where somebody in a certain sphere and many times thousands or even millions of people in a certain sphere will feel some changes you make.

Every one of you has the power to change the universe; every one of you, through these laws. God created these laws with this power for every one of you, when you are living in your free will completely and living in harmony with Divine Love completely, to change universes.

Now if we're not living in harmony, we have less power but we still have an effect. For example, don't you think that someone like Hitler had an effect through the choices that he made? And don't you think that both his mother and father had an effect on the earth through the choices they made and the way they treated him? Can you see we all have a positive or negative effect, but our positive effects are going to far outweigh any of our negative effects, and this applies to Hitler as well. Any negative effect from him being present on earth and making the choices that he made will eventually be overcome and he himself may even become a Celestial spirit one day.

5.5. God's Laws make it impossible to make a permanent mistake

Every single person who has ever lived has that prospect through these laws that God made. Isn't that wonderful? That means that not a single one of us can make a permanent mistake, that's a wonderful idea isn't it? How many times have you been told as a child that if you make a mistake it's permanent? But in reality there's no mistake that you make that is permanent. So isn't that a bit of a relief? That means then that you can make a mistake on the Divine Love Path but its okay, you'll be able to undo it at some point, and that's a huge relief.

That will also be a relief to millions and millions and millions of spirits who are locked up in the first sphere, feeling like that's where they belong now forever. The thing is they don't have to be that way. It's just because of this one belief we've been taught, usually from a young age or from a religion that you can't change once you've passed. Or if the belief is from an eastern religion, then you can't change unless you reincarnate. None of these teachings are true and if we know the truth, it can free us totally. That's why the truth sets you free.

One of the discussions we'll have in the future about some of the laws will be about the Law of Free Will. When we talk about that you'll see actually that what God is teaching you to do is how to exercise your free will in its freest capacity possible. Because you think about it, if I'm exercising my free will in disharmony with most laws, what's happening? I am receiving the consequences on my soul of each law that I'm in disharmony with. Now that's like a prison. Can you see that? It's like I'm getting bombarded constantly in that state with all of the consequences of the laws that I'm breaking. Now you imagine if you were not breaking a single law. That would mean there is no consequence; there are no painful "I'm unhappy" consequences in that state. So what's that state going to feel like? No pain in my body, no pain in my spirit body, and all my desires getting fulfilled because all of my desires are harmonious with the Laws of Love. So imagine what that state's like because that's the state you are headed towards. It's a very, very beautiful state.

6. God's Laws provide a way to discover truth

So the beauty of law is that there is an automatic consequence. Now why did God make it that way? Well God made it that way to give immediate correction to every single person. Now remember we said way back in the beginning of our discussion that there's two ways you can learn; one way for you to learn is to do everything via an experiment. So this is what many scientists do; they come up with an idea of some kind, a theoretical proposition, then they get together a whole deal of apparatus and equipment and spend a lot of time and effort experimenting with this idea until they come up with what they feel is a firm solution or something of what this idea is all about that's repeatable. That's what they do isn't it? That is experimentation isn't it? You can do that with every one of God's Laws. What you do when you're doing that is that you break the law and feel the consequence or you don't break the law and you don't feel the consequence and you feel the joy of it. And you'll start working through Laws that way. Most of us are not aware that we are doing this every moment unbeknown to ourselves.

That's a beautiful thing because what that means is that I don't have to ask God anything. I can just barge my way through life feeling the consequences of my every action and sooner or later I'll work out the truth. Now when I say sooner or later it'll generally be very much later doing it that way.

6.1. *Learning from others*

Now the alternative is to learn the law from someone else. So instead of feeling that I've got to test everything out myself, the alternative is that I start learning laws from other people. This is a bit like going to school; the teacher tells you something and then you go to High School and there's new things that you learn, and then you go to University and there's new things that you learn and so forth; you're learning new things all the time. Now there's two ways we can get taught from other people, and when we are just getting taught from others, there are two different paths that we talk about. We could have others on the Natural Love Path who can teach us a lot of really good things all about natural love, and then there are others on the Divine Love Path who can teach us a lot of things about the Divine.

OTHERS
 - NATURAL LOVE
 - DIVINE LOVE

So let's look at how we learn; we can learn from others. Learning from others means you know somebody who knows how to do something and you don't know how to do it so what do you do? Just go and ask them. But if you've got a bit of pride, will you ask them? No, you'll want to work it out yourself, agreed? If you've got a bit of pride, you'll want to work it out yourself and then after a while you're working out things, and let's say you spend a hundred years trying to find the answer and you still haven't found the answer, by now your pride might be a bit less there and so then you ask. The beauty of this is that any single person in the spirit world or on earth can teach you something. If they're on the Natural Love Path they can only teach you things to do with natural love, while if they're on the Divine Love Path they can teach you things to do with Divine Love. Any person can assist you in that way.

6.2. *Learning from God*

The other source of teaching you anything is God. Now the thing that makes sense about connecting with God is that God knows all the answers. So you can ask me if you want but I don't know all the answers. The only person that knows all the answers is God, so what's the point in connecting with me who doesn't know all the answers when you could be connecting with God and finding out all the answers yourself? There's not much point really is there, if you think about it? Can you see the importance of your relationship with God?

OTHERS
 - NATURAL LOVE
 - DIVINE LOVE
 GOD

Now God is giving you these two choices. Firstly, do I investigate for myself? Which means, I don't ask God and I don't ask others, and I do some experiments. You can do it that way and you'll have some pretty good events happen to you and you'll also have some fairly painful events happen to you. And you'll work through those issues emotionally until you get to a point where you think you understand what the truth is. So that's one option.

Another option is to ask others. Asking others has the benefits that you can learn things a lot more quickly. Something that might take you a year to learn by yourself might take you a month to learn if you ask somebody else to teach you what's going on. But it requires a degree of humility.

6.2.1. *Learning from God requires humility*

Then of course you can ask God, which requires the most humility possible. When you think that God is the creator of the universe, and you're going to the creator of the universe, you're going to need a fair bit of humility to be able to hear this

creator of the universe telling you answers that you don't want to hear. You see when we go and ask the other person; we can have an argument with them. We can say, "I don't agree with that. That's not right." But do you think God actually gets into arguments with you? When God tells you something and you don't want to hear it or you don't want to believe it, does God say, "You naughty person you"? God doesn't do any of that. Can you see how you need to be the most humble? Because God is not going to have an argument with you! Now with others maybe some of them will have an argument with you. Some of them may say, "No you're in the wrong state now," or, "I'm leaving." At least they'll tell you that but God won't even do that because God is the most Loving Being, accepting your free will in the most loving way. And so you won't get an argument from God but you will have a consequence. And the consequence is that you'll have to find some other way of learning and all other ways of learning are not as effective. The fastest way of learning is to connect to God, to receive Divine Love, and to have your soul expand. Then you understand; that's the fastest way of learning.

God actually created all of these ways for you to get assistance. The biggest way of course is your connection with God. God always answers you. Some people say, "I've asked God lots of things and He's never answered me." Well that's the answer "no", and we don't listen to it most of the time. And so we often think that God should do something a certain way for us but we're often out of harmony with lots of laws in the process. When we're out of harmony with the law, remember there's an automatic consequence. So if we're out of harmony with the way of which you ask God a question, you will not receive an answer. How do we come to God? In humility! What's the definition of humility? I have a passionate desire to experience all of my emotions. So we come to God with a passionate desire to experience all of our own emotions even if they are in error; that's humble. And once I'm in that state with God, I can ask God any single question I have.

Can you see why most scientists on earth can't receive Divine Truth? I don't mean in the sense that they can't, I mean it in the sense that they've chosen not to receive it. Because many of us have so much intellectual knowledge that we're not in a humble place anymore. We won't listen to God say, "You know that bit of intellectual knowledge you have there? Actually that's not the way it all works. And you know this whole idea about solar power or whatever? I know it sounds like a great idea but I've got five other forms of power that are far better than that one, and you could actually be using it at far less cost and far less damage to the environment. Do you want to learn about those ones?" And we say, "No, I don't want to know about those ones." And can you see how we often work on earth? Many times I've had conversations with many of you where you've asked me a question and I've given you an answer and you've said, "No it's not like that at all." You do that with God all the time. You ask God a question, God gives you an answer and you say, "No, it's not like that at all." And the only thing God can say is, "Later down the track you'll find out that I was right." That's the only thing God can do is to say that to you and usually He can't even say that to you because you won't listen to that, so He needs someone else to say that to you.

6.2.2. Receiving Divine Love enables our souls to learn by becoming more sensitive

So let yourself learn from God, learn the laws from God. The Divine Love Path is the way you'll do that by actually having God's Love enter you. When the love enters you, your soul expands in its sensitivity to breaking every law and in fact its sensitivity to breaking anything is greatly enhanced. And a lot of us will say, "Well that's not a very good thing, you're telling me I'll be more sensitive." Yes, you'll be more sensitive. When you see television footage of children dying overseas through war and you cry, you're going to cry far more about that; you'll be more sensitive. You'll get to the point where you'll feel saddened about what's going on in the world around you. But after that you'll actually get to a point where you've released your own causal emotion about what that's triggering and you'll no longer be saddened. Instead you'll have this huge compassion and understanding for what is the creation of that event. And you'll get to that point because God has taught you.

So allow God to teach you Her Laws. There's millions and millions and millions of laws but the simplest of them is the most powerful, and that's beautiful when you think about it; there's a poetic irony in that. All of these so called learned people and gurus have all of these different laws in their minds and their hearts, but in the end the simplest possible thing you could ever conceive is what God's conceived for you to understand at its most powerful form. You think of the beauty of that creation alone; it's just amazing. Amazing what effect that can have on your life. That means that a little child of two or three years of age can understand this process and they can become at-one with God so rapidly that by the time they are six or seven, do you think they'll have any negative Law of Attraction at all? This is what's available to us as a race but unfortunately it's not acknowledged or enabled yet.

6.2.3. *God's Laws expose emotional error*

So what else do these laws do for us? Another thing they do is they expose emotional error. E cubed! So every single law has been designed to help you find the emotion inside of yourself as to why you desire to break that law or others desire to break that law. It exposes the emotional error, or you could say it highlights the emotional truth. Every single law brings truth to you; every single law has been created that way.

6.2.4. *Negative feedback through pain and suffering*

So the basic principle of that is this. There are two forms of negative feedback and there are forms of positive feedback that we can experience from God's Laws. Let's look at the negative feedback. Do you understand what I mean about negative feedback? Feedback to us at our soul level that makes us feel worse; we'll call that negative feedback. There are two forms of negative feedback. The first form is pain; the instant you break a law of any type; there'll be an instant painful response. The pain can be physical, it can be emotional or spiritual, or it can be soul-based pain at a really deep level that we've so detuned from we can't even feel it at the time. But there will be pain every single time I break a Law.

The second thing is suffering. Now the difference between pain and suffering is that pain is the instant response to the breaking of a law, whereas suffering is when it goes on and on and on and on. So if we're in pain or suffering about any issues then it's because we are getting some feedback that we think is negative or painful. But actually it's very positive; it's letting us know what's going on. So we're getting negative feedback or painful feedback straightaway that we've broken a law.

NEGATIVE FEEDBACK

- PAIN
- SUFFERING

6.2.5. *Positive feedback*

What about the "positive" feedback from God's Laws? What happens then? "Positive" is in quotation marks again because I feel it's all positive. What happens? This thing called joy, happiness, peace... the list of positive feedback is a lot greater by the way... relief, bliss. So there are all these different feelings that are actually positive feelings that we are doing the right thing. In other words we are living in harmony with the law.

POSITIVE FEEDBACK

- JOY
- HAPPINESS
- PEACE
- RELIEF
- BLISS

God has created this automatic feedback system where if we are sensitive to our emotions in every way, we'll be willing to feel the pain and we'll never get to suffering. Because in the end, pain is really the only thing that we need to feel to be corrected! We don't need to feel suffering to be corrected. All we need is to feel is the initial pain. If we feel the initial pain when we know we just did something wrong, something out of harmony with law. That's the only thing we need.

Negative feedback, if we can call it "negative", is the pain to tell us when we have done something out of harmony with law. And then there are all of these beautiful things that happen when we do something in harmony with law. You feel excited when you're in harmony with law, you feel passionate when you're in harmony with law. If those things are not present in your life and you're feeling some pain, then it's because there's some disharmony with law happening.

6.2.6. *The example of the Law of Desire*

Let's look at the Law of Desire for example. There's a law called the Law of Desire where if you act in harmony with what you truly feel inside of yourself, you will either create some really beautiful things or some really negative things. It

doesn't matter which way you create, if you create unlovingly you'll get some really painful negative results, if you create lovingly you'll get some really positive blissful outcomes. So let's say this Law of Desire is operating constantly in your life. Let's ask ourselves the question, "Am I living right now in what I really desire?" How many of us go to a job that we do not like? "Am I living in my desire?" The consequence of breaking the Law of Desire is that I feel the pain of not having my desires fulfilled. So I'm not actually experiencing the joy and the happiness and the peace and everything that I could be experiencing. Now what might cause me not to activate my desire? An emotional fear. So obviously there's a fear, an emotional fear that I need to work through to enable me to activate my desire. So work through it. Identify it, work through it; let yourself feel it.

Can you see how God has give you all these positive things to tell you when you're on the right track and God's given you one thing that we often call negative to tell you when you're on the wrong track? And yet most of us end up living in this one thing that's in the negative and not having very much of these positive experiences in our lives because we are often are breaking the law. Can you see how it all works together?

6.2.7. *The example of discovering Divine Truth*

There's all of these laws that work together and the reason why I wanted to have this discussion with you is that it's so important to see that God's done all of these beautiful benevolent things for you to tell you when you're on the wrong track. So for many of you when you first heard the presentation of Divine Truth in your life, how did you feel? Excited, overwhelmed with joy, relief; these were all feelings, weren't they? Initially that's what you felt, wasn't it? And then I talked about this thing called emotions and then, "Whoa!" How did you start feeling then? We start feeling some of the pain then. And the reason why that is initially our joy at finding truth was the positive feedback we needed from God to tell us that we're actually finding truth. And then what happens is we go into this pain-based and fear-based emotion of doubt. And when we kick into doubt all of these other things start happening.

Now obviously if I've got a heap of stored emotion that is painful in me, I need to release it. On the Divine Love Path I'm not always going to receive these positive feelings because I've stored the negative ones for such a long time that they're going to have to come out now. But when you actually allow them to all start coming out, you'll get out of this pain or suffering cycle. Initially you'll just be feeling the pains that you have suppressed but eventually all of those will be gone and then where will you be? Just in the positive feedback mode, in the way then that we experience everything.

So let yourself trust your feelings. What is your soul? It's your feelings, your emotions, your passions your desires. Lately I've had a lot of people ask me, "I thought such and such a spirit person came along to talk to me the other day, what do you think?" And I'm saying, "What do you feel, was it that person or not?" "Well I feel it was that person." "So why do you need me to confirm it? Why don't you trust your soul?" Most of the time, we do not trust our soul. Most of the time what we're doing is we have all of these emotions that cause us to not trust our soul and so we kick into our intellect. But your intellect is thoroughly useless at helping you with your soul. Honestly! The only thing it's good for really in the sense of helping your soul is, "Yes I want to feel all my emotions." But even then if your soul feels, "No I don't want to feel any of those emotions," your intellect is not going to be able to help you there. So can you see that the intellect is this very limited tool that you have, that most of us live in for a long, long time on the earth? But we need to give that up and start living in the feelings and the emotions and noticing this negative and positive feedback that occurs in our lives. When we notice this feedback occurring in our lives, we know straight away a law is broken.

6.2.8. *An example of a previous relationship of AJ's*

So in terms of a practical situation, and I've described this to you before, what happened for myself is for years and years I was wanting a relationship with a woman who did not want a relationship with me. And almost every single day I would cry about that. "What's going on? I'm suffering. Why am I suffering? I'm breaking a law. What would this law be? It must be the law related to self love." Can you see if I'm suffering then I can start knowing what's going on?

6.2.9. *An example of discovering cancer*

Let's give you another example. Let's say all of a sudden there's this pain that starts to develop in my body and I go along to the doctor and I find out that I've got cancer. The pain is saying I've broken a law. Now what can the law be? Where is the cancer? Let's say it's in my left breast, what would it be? What you need to do is feel what it's all about. It's you and your body; you need to start feeling what it's all about. Now we've been taught by some others that it's to do with an emotion that I'm suppressing; suppressed anger. So I know it's related to some anger that I feel so then I can just let the

Law of Attraction tell me what that's about. So I pray to God, "Please tell me what this is all about", and next day I get a man very angry with me and I just placate him. "Ah, a man was angry and upset with me and I didn't allow my anger. I suppressed my anger." And I'm not suggesting that you allow the anger and verbally abuse him; what I'm saying is feel the emotional desire within you to do that and allow yourself to see what it is; there's God's message; straight away there's my answer. I know what it is. And this will happen instantly for you like that, constantly if you allow yourself to see the positive and negative feedback that comes from actually dealing with laws. You don't need anyone else to help you do that then, do you? You can do that yourself. You can just trust your own feelings at the soul level and go ahead with that.

Now if you trust your feelings and make a mistake, what happens? There's a consequence that will be painful and you'll notice. Are you punished for it? No. You don't have to worry about that. It's just that you know you did the wrong thing so you're on the wrong track. Now unfortunately for me I'm a very slow learner and in the example I gave you earlier about my relationship, the suffering continued for years and years and years before I learned one thing about love. At the beginning I was not sensitive to it, that's why it took so long, but if you're sensitive to it you can see it can be quite a rapid process, if you're sensitive to what's going on. So allow yourself to be sensitive to the response that your soul has to breaking the law.

6.2.10. *Receiving mixed feedback*

Participant: AJ what if a situation brings all of those feedbacks both positive and negative?

Then there's a certain law you're breaking and a certain law that you're not. The truth is if you're not breaking a law there are no negative events or negative consequences unless it's an old experience; that's the only proviso. So let's say something triggers an emotion in me that relates to an emotion when I was three with regards to my father that I stored and suppressed. Well obviously if that's coming out then that's still a positive experience because I'm actually now feeling the pain that created my suffering and I do need to do that. That's the only times where we will have painful experiences; through the stored pain of our previous experience.

6.2.11. *Understanding God's Laws provides a way to end all suffering*

So can you see how beautiful God's Laws are? They're all there to create these beautiful surroundings for you to actually access every single emotion within you that prevents your connection with God. And you don't need anybody else to help you. If you connect with God and you have humility, you can actually do the whole lot without assistance. But why would you want to do that when you've got people around you, spirit friends around you who can assist you, as long as you are humble? Why wouldn't you just connect with them? Let yourself feel the feedback system God has given you to identify whether you are actually progressing or not, let yourself do that.

God has created these beautiful loving laws and later over the coming months I'll be talking about different laws in detail and how you can actually activate them to experience your joy in your life. But God has created all of these laws for your benefit, for your soul's benefit, they all have joyful consequences if you follow them and they all have painful consequences if you deny them. That's beautiful in itself because that means in the end that everyone on this planet at some point in time will understand that one principle and everyone in the spirit world will at some point in the future understand that one principle. And we will be able to get from where we are universally... and particularly here on earth where there are still a lot of war crimes, suffering, pain and all these things... we'll be able to get rid of all of those things just by understanding this process within ourselves. And we can choose to follow the Natural Love Path if that's the way we want to do it or we can choose to follow the Divine Love Path if that's the way we want to do it, we have the free will to choose either path and we can progress in such a manner that this whole world will change around us as a result.

6.2.12. *Becoming at-one with God is a gradual process*

Participant: AJ, will changing from your natural soul into a Divine soul be a gradual process?

It's always going to be a gradual process. The sinner does not become the saint overnight. A lot of religions say you have a deathbed repentance and what happens? Now you're in heaven and you don't have to go to hell anymore. This is not how it works. The changes have to happen at the soul level. And this is the beauty of it when you think about it; every single change has to happen at the soul level and so therefore it will be real; it will be something that you will actually

feel inside of yourself as a real change. So allow yourself to make the changes. Allow yourself to feel the changes that you need to feel in order to progress.

6.3. *The Laws of Grace, Forgiveness and Repentance*

Participant: Within the Laws of Divine Love, when does Divine Grace begin or is that just terminology?

It's a Law, it's to do with forgiveness and repentance and it's one of the things I've already discussed. Remember the Laws of Forgiveness and Repentance that I discussed? Grace is one of those laws; they are part of that group of laws. I often think of grace as the process of God removing the causal emotion from within you because you have worked through the issue of repentance about things and God doesn't expect you to pay the penalties of the laws; that's the grace involved. You see what we do on earth here, if somebody does something harmful against us, we want them to generally feel all the pain I felt about what they did and even a bit more would be good so they don't do it again! That's how we feel. If God felt that way, none of us would ever exist. So God doesn't feel that way. What God feels is this feeling that once you come to recognise the causal emotions within yourself that created you or motivated you to take the actions you took disharmonious with love, and are willing to experience that emotionally, God can remove the cause. And not just remove the cause, but also remove the potential Law of Compensation effects as a result.

And that's really beautiful if you think about it because if I've done something like Hitler has done, I can actually progress. With the Law of Compensation you imagine how hard it would be to progress; you've got quite a few million Jews who have been slaughtered and then you've got the motivation for war and all these other things that went on. It's not that Hitler's totally responsible for all of that but I'm just giving you an illustration. Imagine if you just kill one person, the effect on how many people. How many people does that affect? It affects their family, their friends, it affects their life on earth, it affects the potential children they could have had, and how do you fix all of that? That's a pretty big thing to attempt to fix, even with one person. Now just multiply that by ten million, how hard would that be? Now with the Law of Divine Love it's all able to be repaired but with the Law of Compensation it's able to be repaired but obviously it will take a long, long time.

By the way, just before I answer the next question, the spirits here are now feeling more buoyant which is good and are starting to feel that there's a way of working through these things and understanding law and so forth. So that's really good and I just want to encourage them for a moment now that they don't really need to listen to the rest of our conversation, all they need to do now is to connect with some brighter Divine Love spirits and they can speak with you about what's happening in your life and how to work through your emotions and that's enough now for you, you don't need to stick around any further if you don't want to.

6.4. *What attracts people to the Divine Truth*

Participant: On the question of Divine Grace, I was talking earlier on to someone about that today and I felt that every one of us that have been here today are receiving Divine Grace by the fact that out of six billion people on the planet we are sitting in this room are listening to and receiving God's gifts through you. And I think that's really an amazing gift.

And it says a lot for your own Law of Attraction as well in terms of how much you desire truth and how much you want to practice truth. So even if you're getting downhearted sometimes and you're feeling this all seems pretty hard and you're feeling like you're not really getting through your emotions, the fact is that being here has its own Law of Attraction. The fact is that you're learning things that you've never learnt before, and that's coming from your own desire; you've only got yourself to thank. But you also have God to thank too obviously because these are beautiful truths that very few people in the past have ever learnt on the earth. But you are all now learning them on the earth. The beauty of that is unimaginable for you in the future, you have no idea what that's going to mean for you future. Even if you pass because of the experiences that you will not have to have, which the average person who passes has to have in order to learn these lessons. So there are a lot of beautiful things happening. So don't cover over what you're learning either; many of you still have a lot of fear about what you're learning, "What are other people going to think of me learning this crackpot stuff?" Not that you think its crackpot stuff, otherwise you wouldn't be here, but you often feel that other people

will feel that you are a crackpot. So deal with that emotion. Work your way through that emotion; let yourself release it so that in the future you can actually speak openly about these truths that are bringing joy to your own heart.

7. Closing Words

So let's finish by summarising Divine Law. Divine Law is a good thing because it maintains the harmony of the universe. Divine Law also is a good thing for you personally because it's your feedback mechanism telling you what's bringing you closer to God or taking you further away from God. It's a beautiful thing, so allow yourself to come to appreciate God's Laws.

One of my personal passions for the last few thousand years has been investigating God's Laws surrounding the soul. And the reason why it's been a really big passion to me is that it has such a huge benefit not only on my own soul but for every single person to whom I can teach those laws. So allow yourself to really feel these laws in your own life and allow yourself to begin teaching those laws to others, by completely understanding them yourself. And remember that the simplest laws are the most powerful ones. So it's not going to be this big complicated process of you learning this and learning that over hundreds of years and then eventually you get to the stage where you understand, it's not like that at all. It can be a very, very, rapid process that a child can understand.

So hopefully today with what we've gone through it's giving you a bit of an overview of an introduction to God's Laws.

Participant: AJ, you talk about the Laws of Divine Love but you don't seem to have shared them with us yet.

I have said a lot about the Laws of Divine Love already in past sessions so my suggestion is to get a DVD about some of those laws. I will be spending a lot more time on them in the future. But one thing I have noticed, and this is something I would like to address to everyone, is that the sessions that we've had about relationships with God have been the most poorly attended sessions. Now the reason why that is that there's still this feeling in many of you that you can't have a relationship with God. Maybe God doesn't want you or that you feel very frustrated in your relationship with God and so forth. So we'll be doing this series of talks on God's Laws, and then we'll go back on the relationship with God again and there we'll be talking a lot about the principles of Repentance, Forgiveness and those kinds of things, which are the highest laws. And my suggestion is that hopefully by then you'll have worked through the emotions that prevent you from allowing a connection with God. Just allow yourself to work through what's going on with your relationship with God.

Also when I use the term God, many of you are still having trouble with that from an emotional perspective. When I talk about God many of you think, "It's all getting too religious now". So allow yourself to work through that emotion because it's not about religion, this is about your personal relationship with God and your own growth eternally. Where does the religion get involved in that? It's not about that; there are some emotions about that, so allow yourself to work through those emotions.

Over the next four weeks what we're trying to do is open up some of the areas of natural love as well. The reason why we're doing that is myself and Mary have noticed that a lot of you are still doing unloving things to others in justification of you dealing with your emotions. Do you know what I mean by that? You start feeling some anger and rage and what's the first thing you do? Find somebody who you can be angry and in a rage with and away you go. That's not harmonious with law, as you'll work out tomorrow. That's not harmonious with law; you're going to harm yourself doing that and harm the other person as well if they have some emotions themselves that can be harmed through it. So allow yourself to start looking at that. This is one of the reasons why we're covering these subjects now; we feel that many times we're connecting with an emotion but unfortunately we're staying in this emotion of wanting to punish, blame or hurt other people rather than actually getting underneath that emotion and into the real causal emotions and experiencing and releasing that emotion.

So that's why we're covering this material now, and after that we'll get back onto this subject of our relationship with God. Hopefully dealing with your emotions will be a little less traumatic because at the moment what's happening for many is you're feeling your emotions, projecting it at another and then getting another Law of Compensation pain in your own soul. Can you see that it's keeping you stagnant?

It's very important you don't break those laws when you're on the Divine Love Path. Can you understand why? It's called the Divine LOVE Path! LOVE Path, it's a LOVE Path; so when you break the LOVING laws there are going to be penalties on your soul. And so the problem is that we can keep ourselves stagnant for some time if we do that. So what we want to do is help you get past that point of stagnation and into this place where you're really owning the underlying causal emotion rather than projecting this stuff at other people around you.

One of the issues I'm working through at the moment is self love and one of the things I've noticed personally with my issue of self love is I have a lot of self love except when it comes to emotions regarding my soulmate or emotions regarding my Father, God. And so what I'm working through now is this group of self love emotions and so I'm personally having a lot of emotions to work through and having a lot of fearful sessions, but in the process feeling quite differently, and as a result my body is now starting to feel a lot less pain than what it was feeling before. One of the reasons why we're also discussing this issue of self love is so that I can talk to you about some of these things that I have worked my way through and share with you how to actually work through some of the issues you have with regard to your own love of self. So hopefully we can do that too over the coming months.

Thank you for your time, guys. (Applause)
