

Series: **Education In Love**
 Group: **Understanding God's Loving Laws**
 Theme: **Life & Development Principles**
 Presenter(s): **Jesus**
 Description: **Jesus briefly summarizes God's Principles of Life & Development that govern the operation of God's Laws, gives examples of the way these principles are built into God's Laws, and answers audience questions about the principles**

Life Principles	
Summary	<p>Life principles transfer God's Life Force to each creation, principle and law ensuring:</p> <ul style="list-style-type: none"> Life energy from God to be given to living creatures Life energy is transferred during pro-creation Life is promoted, nurtured, respected and sustained Imbalance is prevented and repaired Matter that "dies" is transformed to promote life
Definition (What the principles are)	<ul style="list-style-type: none"> The law shall allow God's Life Energy to enter creations The law shall promote, nurture, respect, and sustain life The law shall prevent and repair imbalance The law shall transform death to promote life The law shall allow for life to be given to creations
Objectives (Why the principles are applied to law)	<ul style="list-style-type: none"> To ensure creation, life, survival and balance To ensure matter will constantly change in order to support life To ensure survival before engagement of higher laws is enabled by ensuring that knowledge of the higher law is obtained before using the law To allow living creations to pro-create or replicate
Application (The creation and laws affected)	<ul style="list-style-type: none"> Every law All matter living and non-living
Reveals (What the principles reveal about God)	<ul style="list-style-type: none"> God loves life and created life God promotes, nurtures, respects, values and sustains life God feels that life is precious and sacred God wants us to know the higher laws before we use them
Examples (The principles' applications in law)	<p>Gravity Creates an atmosphere, and prevents creatures requiring that atmosphere from leaving the atmosphere due to physical centrifugal forces.</p> <p>Aerodynamics Requires knowledge (instinctual or obtained by investigation) of the law before flight can be obtained and prevents accidental engagement of the law without understanding principles.</p> <p>Compensation Prevents the degradation of a soul to the point that the soul cannot sustain its own life.</p>

Life Principles (cont'd)	
<p>Examples (The principles' applications in law)</p>	<p>Earth systems The earth's systems can maintain themselves and work to 'right' themselves (repair itself, regain equilibrium) even under extreme pressure (pollution etc) from other forces.</p> <p>Human bodies The human body has millions of automatic inbuilt correcting, detoxifying and eliminating systems that enable us to maintain life even under severe hardship or physical and emotional strain.</p>
<p>Conclusion</p>	<p>Life principles: Allow any creation to receive God's Life Force and then be able to supply that life force through its own pro-creative ability. Life principles also ensure that life remains sacred and that all mechanisms are created to support and sustain life.</p> <p>Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose life principles including: War, abortion, health care, eating meat, pollution, fear of emotions, fear of death, etc</p>

Development Principles	
<p>Summary</p>	<p>Development principles allow each creation, principle and law to evolve, grow and change positively ensuring: Expansive change is forced upon all matter Growth is supported, encouraged and sustained Positive development and evolution occurs for all matter Increasing capacities can develop within all creation Self-determination of the human soul</p>
<p>Definition (What the principles are)</p>	<p>The law shall force expansive change upon all matter The law shall enforce, support, encourage and sustain growth The law shall support, encourage and sustain development and evolution The law shall support adaptation to different environments</p>
<p>Objectives (Why the principles are applied to law)</p>	<p>To ensure an enhanced condition of love develops over time To ensure the entire universe and all creatures never remain stagnant To ensure increasing capacities within all creation To allow self-determination in the human To allow life to adapt to harmful environments created by the human</p>
<p>Application (The creation and laws affected)</p>	<p>Every law All matter living and non-living</p>
<p>Reveals (What the principles reveal about God)</p>	<p>God loves, desires and enjoys the growth and development of His creations God has an expansive and generous nature God is a parent who delights in the expansive growth and joy of the human God values and encourages the development of all creatures God is not motivated to punitively or arbitrarily restrict His Creations</p>
<p>Examples (The principles' applications in law)</p>	<p>Gravity Gravity's existence allows my investigation and development in all forms of endeavour while remaining safe and secure.</p>

Development Principles	
<p>Examples (The principles' applications in law)</p>	<p>Aerodynamics Knowledge of the law allows enhanced forms of travel and experiences (i.e. growth and development in my ability to move around).</p> <p>Human bodies Sperm and egg. Woman's womb supports the environment of development. Allows reflexes and instinct to develop.</p> <p>Compensation This law encourages me when I'm out of harmony with law to get into harmony with law by encouraging me to develop and change.</p> <p>Design and development of the universe The entire universe allows positive and negative development, but supports and encourages positive development only.</p> <p>Transformation The principle of development supports the complete transformation of the human into a different creature upon the reception of Divine Love.</p>
<p>Conclusion</p>	<p>Development principles: Allow any creation to develop and change by ensuring that the mechanisms for change and adaptation exist within the creation itself, and exist within the controlling laws.</p> <p>Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose development principles including: Being attached to the past, nostalgic, opposing release of emotions, opposing resolution of interpersonal issues, opposing changes of family and friends, opposing experimentation, placing financial matters ahead of development, resisting emotional recognition of personal truth, restricting children's natural curiosity and experimentation, controlling outcomes and attempting to reduce the consequence of choices, etc</p>

Life & Development Principles Q&A

Use the morning as an opportunity to formulate my questions

Examine the "Life & Development Principles" outline
Think & feel about what I would like to ask

I want my questions to be to the point, succinct and direct

Stop telling stories, raise the issues directly
Stop parroting what I think, rather than asking Jesus what I want to know
Use the microphone properly

Questions About

Life principles

What the principles are
Why the principles are applied to law
The creation and laws affected by the principles
What the principles reveal about God
Examples of the principles' applications in law

Development principles

- What the principles are
- Why the principles are applied to law
- The creation and laws affected by the principles
- What the principles reveal about God
- Examples of the principles' applications in law

Questions Answered

00:43:27 Kate Eckersall

Could you explain or give an example of how fear of emotions opposes Life Principles?

00:46:39 Mary

Example: How suppressing emotions or living in fear effects creation around us

00:47:48 Alice Rosenbloom

An example of the Law of Compensation given is that it prevents degradation of a soul to the point that the soul cannot sustain its own life. How is that accomplished?

00:53:12 Pierre Joseph

To be in harmony with Life Principles, should everything we create be self-maintaining and repairing?

00:57:25 Pierre Joseph

Does God supply us with His Life Force only at the time of our conception or all the time? If He stops, do we die?

01:01:56 David Raizman

So do you mean that the mechanisms for change though created within me only exist as a potential due to free will, and not an inbuilt function?

01:05:22 Fab Tolli

Does the Development Principle force change in all creation even if our desire is to avoid change?

01:08:50 Mary: Questions from 6th sphere spirit

Without desire to change doesn't degradation automatically occur due to disharmony with Development? And isn't degradation a change and therefore in harmony with Development?
