Title:	**Using the Divine Truth Hard Disk Drive (HDD)**
Category:	**Technical Document**
Author:	**Jesus**
Description:	**Introductory detail about how to use the hard disk drive that contains copied Divine Truth data sourced from either the Download Material to a Device or Copy Material to HDD Divine Truth services.**
Date/Time:	**25th January 2019 at 11:30am**
Location:	**Wilkesdale, Queensland, Australia**
Revision:	**1**

Using The HDD

1. **Open Windows Explorer (Windows) or Finder (Mac) and navigate to the following location on the hard disk {drive}:**

    1.1. **Windows:**

    {drive}\pu\dt\share\sites\main\en

    1.2. **Linux & Mac:**

    {drive}/pu/dt/share/sites/main/en

    1.3. **Find and run the "index.htm" file in the selected folder**

    Double-click on the file "index.htm". This will use your default browser to open the html file. As a result, your local hard disk drive copy of the website will load on your screen.

2. **You may now use the website exactly the same way as you would online, except that the website is offline and does not need an internet connection to operate.**

    Every time you access a document, audio, or video, your browser will immediately open and run the accessed file from the local hard disk drive copy of those files.

    No internet data will be used unless you select "Youtube" or "Vimeo" links, or you click on links to external websites not included in the copy.

3. **You may also copy the entire contents of these folders to any other location or hard disk drive using the same folder structure.**

    This lets you share the same information with your friends without them needing an unlimited internet connection. All information needed is stored on the local hard disk drive.

4. **If you have an unlimited internet connection, you may also synchronize your local hard disk drive copy with our Divine Truth synchronization servers.**

    This lets you have a continually updated copy of the information locally. This is very handy if you copy information for others, or if you have multiple computers at home using the Divine Truth videos.

    Information about synchronization:
    https://www.divinetruth.com/sites/main/en/index.htm#howto-access-sync.htm

    Synchronize from: **rsync://sync.divinetruth.com/pu/**

    Synchronize to: **{drive}\pu**

5. **If you do not have an unlimited internet connection, you will need to get updates to your drive by sending your drive to us or someone who you know with a latest copy of Divine Truth information, and we/they can update the drive for you.**

    Our postal address:
    Divine Truth
    71 O'Dea Road
    Kingaroy QLD 4610
    Australia

    Please ensure you provide return postage costs and follow instructions on our website:
    https://www.divinetruth.com/www/en/html/index.htm#howto-access-hdd.htm

HDD Contents

1. **Your hard disk drive contains the following folder and file structure:**

Folder	Description
/pu/dt/	The main location of all of the Divine Truth files
/pu/dt/sites/main/en	Contains a local copy of the complete Divine Truth website which runs without needing internet access. To access the local website open the "**index.htm**" page using any browser. The links all operate from this page, including links to play audio files, videos and clips.
/pu/dt/video	Contains video
/pu/dt/audhi	Contains hi resolution audio
/pu/dt/audlo	Contains low resolution audio
/pu/dt/clips	Contains video, hi resolution audio, low resolution audio & documents relating to clips of extended videos

Folder	Description
/pu/dt/docts	Contains documents
/pu/dt/devic	Contains documents for special handheld devices
/pu/dt/metad	Contains searchable text metadata used for vimeo and youtube descriptions, as well as text content for all outlines and transcripts (eventually)
/pu/dt/other	Contains different files such as zipped files and other combined material
/pu/dt/photo	Contains photographs and thumbnails
/pu/dt/progs	Contains an updated local copy of the programs, applications and scripts we use for: /sync — The latest copy of rsync applications needed for synchronization of data from Divine Truth synchronization servers for Windows and macOS. macOS, Linux and other operating systems can use normal rsync programs installed with those operating systems. /video — The latest copy of vlc applications needed to play videos if you do not have a video player on your system already for Windows and OSX. The latest copy of these apps are available from http://www.videolan.org. If you do use these apps, please donate to the organisation that supplies them. /instruct — Contains instructions for using Divine Truth YouTube, Website, and Synchronization Services. /scripts — Contains scripts that can be modified and used on Windows, mac, and linux for updating disks with Divine Truth data.
